Diabetes Medication Guidelines for people with diabetes requiring Upper GI Endoscopy

York and Scarborough Teaching Hospitals
NHS Foundation Trust

Morning appointment
Non – insulin medication recommendations

Day before the procedure

<p>Omit the SGLT2 inhibitor (e.g dapagliflozin, canagliflozin, ertugliflozin) Take all other medication as normal the day before</p>
--

Day of the procedure

Medication	What to do
Metformin	Take as normal in morning - if a dose is taken at lunchtime – omit this dose
Sulfonylureas (e.g. gliclazide, glipizide, glimepiride)	Omit the morning dose. Take usual evening dose if taken twice a day following procedure
Meglitinides (e.g. repaglinide or nateglinide)	Omit morning dose Take usual evening dose if taken twice a day following procedure
Pioglitazone	Take as normal
DPP4 inhibitors (e.g. sitagliptin, linagliptin, alogliptin, saxagliptin)	Take as normal
SGLT2 inhibitors (e.g. dapagliflozin, canagliflozin, empagliflozin)	Omit dose
GLP1 injections (e.g. exenatide, liraglutide lixisenatide, dulaglutide)	Take as normal

Remember to test blood glucose more regularly if you usually test, and that your glucose level may be a little erratic for a few days after the procedure.

Keep hypo treatment with you in case of low blood glucose levels (glucose level under 4 mmol/L)
