STANDARD OPERATING PROCEDURE

Q-Pulse reference:

Daily Nursing and AHP Workforce and Escalation Meetings

Adult Inpatients Wards

DOCUMENTATION CONTROL	
Documents must not be printed from Q-pulse	
Complete if making a controlled copy: This copy was made by: Reason for copy:	
Controlled copies must be recorded on Q-pulse. Copies printed from an electronic source or photocopied from controlled copies will be void.	

PURPOSE:

This SOP is intended to detail the process for holding the daily staffing meetings' escalation.

INTRODUCTION:

This SOP is designed to ensure that there is an organisational response and escalation when nurse staffing levels are having an impact on patient care and how we respond to this.

Expectation 1	Expectation 2	Expectation 3
Right Staff 1.1 evidence-based workforce planning 1.2 professional judgement 1.3 compare staffing with peers	Right Skills 2.1 mandatory training development and education 2.2 working as a multi-professional team 2.3 recruitment and retention	Right Place and Time 3.1 productive working and eliminating waste 3.2 efficient deployment and flexibility 3.3 efficient employment and minimising agency

It is important that the language used to describe the staffing required for a safely managed ward environment is clearly understood across the Trust.

Safer staffing requirements are a dynamic process. Although it is important to set

a nursing establishment for each ward to recruit to, it is recognised that this establishment requires monitoring against patient acuity and dependency and professional judgement for its impact on patient outcome. Professional judgement will always override any planned nursing hours based on several factors which include skill mix, occupied beds, acuity and dependency and activity within the clinical area. All of which can change from hour to hour in the clinical setting. It is therefore critical that the responsibility of the senior nursing team is to agree the numbers of nurses required to maintain patient safety at that point in time through discussion with ward staff and the use of professional judgement.

The daily deployment of staff is based on staffing numbers, patient acuity, dependency and professional judgement.

Firstly there is a requirement for:

- Local mitigation at ward/Care Group level through redistribution of staff or use of non-direct patient facing roles
- Wider redistribution of staff from other Care Groups following escalation to MoD
- Use of over time, additional hours from part time staff and going out to bank and agency (consider request to increase agency rates 'over cap')
- Escalation to daily staffing meeting if not able to mitigate staffing requirements within the Care Group or through mutual aid, and request additional support.
- For any urgent staffing concerns this should be escalated immediately to the most appropriate person (Matron/ACN/Head of Nursing/Silver Nurse).
- Consider reduction in beds or services with Matron/ACN/ Corporate Nursing/Silver Command

PROCESS:

07:00

Daily Workforce and Escalation SOP Version 3
April 2022
Author: Diane Cavenche Associate Chief Nurse

Bed manager to send overnight report prior to the 08.30 meeting to relevant site
Matron group/ACNs and HONs

08:30

Cross Care Group Meeting – Site Specific

York and IPUs

Scarborough and Bridlington

The aim of this meeting is to discuss any areas that are **not mitigated** for the early and late shift, to escalate to the senior nurse of the day and discuss any further mitigation before silver to ensure we can articulate the risk to patients on specific wards at both silver and operational meetings.

Prior to the meeting Matrons for each area will need to complete the staffing sheet (appendix 1) to RAG rate their areas.

NB

As multiple Matrons will need access to the Q drive in a short timescale it is acceptable to save your care group form in the folder for that day which can then be merged following the meeting.

Q:\MATRONS-York\CQC Daily Staffing - York\2022\April\

Red Flags - **this should be undertaken by each Care Group prior to the meeting and the shift RAG rated**

Red Flags are designed to act as an alert to indicate if patient care might be compromised due to staffing levels. Red Flags allow staff to clearly articulate the impact of the staffing pressures to ensure the areas in most need are prioritise

Daily Workforce and Escalation SOP Version 3
April 2022
Author: Diane Cavenche Associate Chief Nurse

1. Number or skill mix of nurse staffing below requirements (based on base line shift requirements + enhanced supervision needs)
2. Inability to provide enhanced supervision where DoLS/vulnerable patients are identified
3. Clinical treatment/intervention delayed or missed.
4. Delay over 30 minutes in providing symptomatic relief
5. Patient vital signs not assessed/recorded as planned
6. Inability to meet personal care needs
7. Delay/omission of regular checks on patients
8. Challenging behaviour from a visitor
9. Staff unable to take breaks

There should be a Matron from each Care Group at this meeting, along with an AHP representative and the coordinator for deployment of non-clinical staff.

The ACN/HoN may, for ease, share the staffing sheet on the screen for whole meeting awareness & update in real time as able.

Points to discuss in the meeting

- How many patients waiting for a bed in ED for acute floor
 - Less than 10 = green, 10-15 = amber and 15 = red, as this will determine the added impact on acute admission flow
- Review the early and the late shift
- Acute admitting wards – should not go below ‘unmitigated red flag’ levels
- Discuss wards that are ‘unmitigated’ and any further deployment required
- Any escalations from overnight operational report to discuss

- Describe the impact where fundamental care is/will not be achieved / DOLs and enhanced supervision on the unmitigated wards dependent on skill mix etc
- Plan of action re any additional support - redeployment of staff, further staff moves to specific areas and to consider the closure of services to support
- Utilise SAFECARE and acuity and dependency
- Following this meeting SGH to provide update to ACN/HoN of the Day
- Escalations / actions to be recorded on staffing sheet

09:30

- Escalation/update to Silver nurse from ACN/HoN of the Day via telephone and electronic RAG rated form to be sent showing unmitigated wards, risks identified and escalations required
- Silver nurse to feedback to ACN/HoN/ of the Day updates from escalations made.

12:00

- Site specific staffing telephone call from ACN/HoN of the Day to MoD for an update of site position and wards still not mitigated/deteriorating situation

14:30

- ACN/HoN of the Day attends the early/late MoD handover to allow full oversight going into the late/night shifts
- Escalations / actions to be recorded on staffing sheet

15:00

- MOD attends the Ops meeting - if senior support is required ACN/HoN of the Day may be asked to attend if escalation required and further action, for example closing capacity is required

16.30 (16:00 pre-weekend/BH)

Daily Workforce and Escalation SOP Version 3
 April 2022
 Author: Diane Cavenche Associate Chief Nurse

- ACN/HoN of the Day attends for handover to on-call teams cross site to provide a sit rep across sites, actions required and to alert to risks identified.
- Escalations / actions to be recorded on staffing sheet
- Following handover further MoD escalations will be addressed by the on call team once the ACN/HoN of the Day deems it appropriate to leave the site

21:00 (16:00 on weekends/BH)

- MoD to handover to Bed Managers & send electronic staffing form with updated escalations/actions

CQC Insight for Acute NHS Trusts

York and Scarborough Teaching Hospitals NHS Foundation Trust

What's new?

FACTS, FIGURES & RATINGS

TRUST AND CORE SERVICE ANALYSIS

FEATURED DATA SOURCES

DEFINITIONS

28 March 2022

What was new in the March 2022 release of CQC Insight for Acute NHS Trusts ... (Insight is updated daily for internal CQC users)

Facts and figures

Refreshed data streams:

HES activity figures

Workforce statistics

SOF has not been updated in this product but trusts receiving mandated intensive support as part of the Recovery Support Programme are indicated on page 4

Featured data sources

Pages refreshed since the January 2022 release to trusts:

Featured data sources refreshed:

A&E Waiting times, Incidents, NBoCAP and NELA

The index list at the beginning of the National Clinical audits section has been removed.

The National Hip Fracture feature page has also been removed while we make improvements to its visualisations.

Outliers featured data source page was removed in January: Due to Covid-19 pressures and recovery from them, the identification and publication of new outliers for maternity and mortality was suspended in March 2020.

Trust and core service analysis

Refreshed data streams:

Trust	STEIS Never Events, CAS, Whistleblowing, NRLS, ESR, C.diff, MRSA, Complaints, Data Quality Maturity Index
A&E	STEIS Never Events, A&E Quality, A&E Sitreps, Ambulance turnaround times
Medicine	STEIS Never Events, RTT, SSNAP, HES readmissions by CCS groups
Surgery	STEIS Never Events, RTT, National Hip Fracture Database, NELA, PROMs, Cancelled operations, NJR, NBoCAP
Critical Care	STEIS Never Events
Maternity	STEIS Never Events, Ratio of births to midwifery staff, Ratio of senior midwives to midwives, Maternity survey 2021
CYP	STEIS Never Events, CYP Survey
End of Life	No refreshed data streams
Outpatients	STEIS Never Events, RTT, HES DNAs, Diagnostic waiting times, Cancer waits

Notes

Next date for sharing: By the end of May 2022

As previously communicated to providers, we will continue to share Acute Insight reports with NHS providers every two months during the COVID-19 crisis and recovery period.

Similarly, analysts and inspection teams will continue to take the effects of Covid-19 into account when considering trust data. Publication of some data collections continues to be suspended, but we will recommence refreshes as soon we can

Version **1.29** of the methodology and indicator guidance contains the specifications of indicators used in this release of CQC Insight for acute NHS trusts.

-----------------	------------	--------------------	--------------	---------	---------------	-----------	-------------------------	------------------	-------------

Trust level rating:

Date of last inspection: 25/07/2019

Trust wide and core service indicators

Of the 71 trust wide indicators, 1 (1%) are categorised as much better, 0 (0%) as better, 8 (11%) as worse and 1 (1%) as much worse. 48 indicators have been compared to data from 12 months previous, of which 1 (2%) have shown an improvement and 6 (13%) have shown a decline

Much better compared nationally	Much worse compared nationally	Improved	Declined
<ul style="list-style-type: none"> Sick days for medical and dental staff-[set target 3.5%] (%) 	<ul style="list-style-type: none"> Whistleblowing alerts 	<ul style="list-style-type: none"> Turnover rate for medical and dental staff (%) 	<ul style="list-style-type: none"> Team Working Never events (total events with rule-based risk assessment) CAS alerts closed late in preceding 12 months Stability of other clinical staff Equality, diversity & inclusion Never events (total events with statistical comparison to bed days)

For each core service, there are different numbers of indicators. When compared nationally, each has been categorised as much better, better, about the same, worse or much worse. The graph shows the number of Indicators for each core service and the number within each category:

- For the 12-month period from Jul 20 - Jun 21, SHMI was within expected range.
- For the 12-month period from Jul 20 - Jun 21, HSMR was as expected.

Summary Hospital-level Mortality indicator (SHMI)

For the 12-month period from Jul 20 - Jun 21, SHMI was within expected range with a value of 0.94 (compared to 1.0 for England) and 2,550 deaths compared to an expected 2,705 deaths.

Hospital Standardised Mortality Ratio (HSMR)

For the 12-month period from Jul 20 - Jun 21, HSMR was as expected with a value of 96.63 (compared to 100 for England) and 1,500 deaths compared to an expected 1,552 deaths. Weekend HSMR is within expected range for this time period.

National clinical audits are priority information to inform discussions about quality improvement.

- Audit results should be followed-up during engagement meetings:
 - Better or worse than expected performance should be used to drive quality improvement
 - Where performance is much worse than expected we would expect this to prompt an investigation by the trust
- National clinical audits are reported here only if the trust participated

Do you have a query or suggestion for national clinical audits? [Contact us.](#)

	Metric	CQC Key Question	2018/19 ¹ Report	2019/20 ² Report	National Aggregate (England & Wales)	National Aspirational Standard	Comparison to other units	
Process measures	36 cases	Completion rate for key health checks for patients aged 12+	Effective	95.4%	95.6%	88.6%	n/a	64% Within expected range 98%
	81 cases	Organisation compared with nationally: Case-mix adjusted mean HbA1c (mmol/mol)	Effective	Within expected range	62.9	65.0	n/a	55 Within expected range 72
Blood glucose diabetes control (HbA1c)	81 cases	Organisational performance compared between years: Median HbA1c (mmol/mol)	Effective	62.8	61.0	62.0	n/a	Clinically important improvement

HbA1c levels are an indicator of how well an individual's blood glucose levels are controlled over time. Higher values indicate poorer control.

York Teaching Hospital NHS Foundation Trust

Key messages

- The table below summarises York Teaching Hospital NHS Foundation Trust performance in the 2019 MBRRACE-UK Perinatal Mortality Surveillance Report for births in 2017. Mortality rates are presented both with and without deaths due to congenital anomalies.
- When compared against trusts with a similar service provision, York Teaching Hospital NHS Foundation Trust was up to 5% higher or up to 5% lower than the average for the comparator group in both measures.

Metric	CQC Key Question	2018 ¹ Report	2019 ² Report	Comparator group ⁴ average (UK)	National Standard	Comparison to other trusts with similar service provision	
4,674 births	Stabilised and risk-adjusted extended perinatal mortality rate (per 1,000 births)	Effective	4.89 (4.29 to 6.09) ³	4.78 (4.17 to 5.96) ³	4.79	n/a	Up to 5% higher or up to 5% lower than the average for the comparator group ⁴
4,670 births	Stabilised and risk-adjusted extended perinatal mortality rate, excluding congenital anomalies (per 1,000 births)	Effective	Not reported	4.10 (3.63 to 5.16) ³	4.16	n/a	Up to 5% higher or up to 5% lower than the average for the comparator group ⁴

Scarborough Hospital

Key messages

Comparing this site to other sites on the 2019 National Maternity and Perinatal Audit:

- Case ascertainment did not meet the national standard of 95%.
- The 'case-mix adjusted overall caesarean section rate for single, term babies' was within expected limits. The audit advises that a RAG rating is not appropriate for this measure as performance that's either lower or higher than expected should start a conversation.
- The site was in the bottom 25% for the 'Proportion of live born babies who received breast milk for the first feed and at discharge from the maternity unit'
- For the other metrics, rates were a negative outlier in 0, higher in 0, similar in 3, lower in 1 and a positive outlier in 0 metric(s) where benchmarking has been applied. In this context, 'similar' means within expected range. For these metrics, higher rates can be interpreted as worse performance, and lower rates can be interpreted as better performance.
- For all metrics, particularly low rates may reflect poor detection/measurement.

	Metric	CQC Key Question	2018 ¹ Report	2019 ² Report	National Aggregate	National Standard	Comparison to other sites
	Case ascertainment (Trust level)*	Well-Led	98.8%	Not reported	97.3%		N/A
Ante-natal	103 cases Case-mix adjusted proportion of all babies at term who are <10th centile, who are born at or after 40+0 weeks	Effective	n/a	54.0%	52.3%	N/A	37.2 Within expected range 74.9
Intra-partum	1,423 cases Case-mix adjusted overall caesarean section rate for single, term babies	Effective	25.6%	25.9%	25.5%	N/A	15.4 Within expected range 32.4

*May be greater than 100% due to do inconsistencies in hospital coding

Concern status:

2018

2019

2020

- No concern
- Concern
- High concern

Concerns live	Escalated to inspector	Action taken	Closed
Under development			

Click [here](#) to contact the Surveys Team to discuss survey data

Concerns are flagged where a high proportion of people told us their experience of care was in line with the worst possible answer to a wide range of questions across the entire survey.

The CQC Adult inpatient survey collects feedback from adult inpatients (aged 16 or over) who spent at least one night in hospital during 2020

The results from the inpatient survey 2020 are not comparable to the results in any previous year. Notable changes since the 2019 survey are:

- The survey is now mixed mode
- The sampling period of the survey changed from July to November
- Results of the survey were presented in three bands previously (worse, about the same and better). From 2020 they will be shown in seven bands which are much worse, worse, somewhat worse, about the same, somewhat better, better and much better than/as expected

Trust results can be seen in the benchmarking reports at <https://nhssurveys.org/all-files/02-adults-inpatients/05-benchmarks-reports/2020/>

INCIDENTS	MORTALITY	NATIONAL CLINICAL AUDITS	A&E WAITING TIMES	PATIENT SURVEYS	STAFF SURVEYS	WRES	

Key messages

- The 2020 NHS staff survey has used the same methodology and timings as in previous years but a key focus of the survey this year has been on understanding the experience of staff during the Covid-19 pandemic period. Results of the 2020 NHS staff survey should be seen within this context.
- The provider's staff survey results are being compared to a group of 128 Acute non-specialist trusts across ten themes all scored 0-10 with 0 the worst possible score and 10 the best.
- The provider scored significantly above average for no themes and significantly below average for Team Working; Staff Engagement; Safety Culture; Quality of care.

Key messages

These graphs show how BME and White staff at this trust have answered the four WRES staff survey questions over time. See the WRES section of Insight for additional analysis

Staff who experienced harassment, bullying or abuse from patients, relatives or the public

Staff who experienced harassment, bullying or abuse from staff

Staff believing the trust offers equal opportunities for career progression and promotion

Staff experiencing discrimination from their manager and/or colleagues

— BME Staff — White Staff

Introduction

The Workforce Race Equality Standard (WRES) now includes HR indicators derived from Electronic Staff Records (ESR) in addition to findings from the NHS Staff Survey, see box 1 for more details.

This page includes key messages from the WRES indicators which are detailed on the following page. The last WRES page includes some background staffing data and information about the NHS Staff Survey for the trust.

Key Messages

- The difference between the experiences of BME and White staff was significant for 3 indicators at this trust (out of 9)
- When compared with other trusts in its peer group, Acute and Acute & Community Trusts, for the four staff survey indicators, this trust had 1 positive finding and 0 negative findings.
- The experiences of BME staff at this trust have significantly improved for 1 indicator and significantly deteriorated for 0 indicators
- The table (next page) shows whether the experiences of BME and White staff were significantly different for each indicator. The presence of a statistically significant difference between the experiences of BME and White staff may be caused by a variety of factors. Whether such differences are of regulatory significance will depend on individual trusts' circumstances.

Indicator 4, access to non-mandatory training and CPD, is not included in the above summary due to data quality concerns.

Box 1: The 9 WRES Indicators

- 1a Proportion of clinical (nursing and midwifery) staff in senior roles, band 8a+
- 1b Proportion of non-clinical staff in senior roles, band 8+
- 2 Proportions of shortlisted staff being appointed to positions
- 3 Proportion of staff entering formal disciplinary processes
- 4 Proportion of staff accessing non-mandatory training and CPD
- 5 Staff experiencing harassment, bullying or abuse from patients, relatives or the public in the last 12 months
- 6 Staff experiencing harassment, bullying or abuse from staff in the last 12 months
- 7 Staff believing that the trust provides equal opportunities for career progression or promotion
- 8 Staff experiencing discrimination at work from a manager / team leader or other colleague
- 9 Board compared to overall staff demographic

Trusts are encouraged to perform a census rather than a basic or extended sample in order to best understand experiences of different staff groups and to get more of their staff to participate in the survey so the trust can better understand issues affecting their staff. CQC inspection staff should follow up on what the trust is doing to understand the potential underlying causes and improve the experience of staff.

Understanding data

What do these boxes show?

The boxes represent all Acute NHS trusts from smallest to largest in five groups, or quintiles. The purple highlighted box shows you where this trust lies relative to the other trusts. If the smallest box is highlighted this trust is in the group of the smallest trust or lowest activity level, and if the second largest box is highlighted the trust is in the second largest group, or quintile, for higher activity levels.

What do N/A, *, and - mean when they are used for data values?

- n/a** Value is not applicable
- Data is not available for trust or time period.
- *** Suppressed values between 1 and 7. We apply a strict statistical disclosure control in accordance with the HES protocol to all published data. This requires that small numbers are suppressed to prevent individuals being identified and to ensure that patient confidentiality is maintained.

EXECUTIVE SUMMARIES

Quality & Safety

Incidents:

- The incidence of both pressure ulcers and falls remains high although there has been a slight improvement in month. Workforce factors continue to be a contributing factor and this has impacted on both the completion of timely risk assessments and delivery of care. Staffing concerns are highlighted daily through the Associate Chief Nurse of the Day so that additional mitigations can be instigated where possible. Datix has been amended to better capture the impact of these incidents. A new Care Needs Summary sheet has been implemented to provide an 'at a glance' view of care required at the bedside. This will help staff, especially those who are redeployed or temporary staff, to quickly identify the level of risk for patients. Priorities for both falls and pressure ulcers have been reviewed and the Trust-wide improvement plans are being refreshed in line with current themes. There is insufficient resource within the Tissue Viability Team to deliver ward-based training and the lack of a Falls Advanced Clinical Specialist is limiting the targeted work previously delivered at ward level. This issue has been raised to Chief Nurse and a paper requesting resource is being taken to Executive Committee in May.
- There was a new Never Event declared in April, now 4 in total over the last 12 months. Each incident has a specific investigation under the Serious Incident Framework.

Medication Incidents/Pharmacy:

- Whilst all incident types remain within normal variation there continues to be a run above average for both prescribing and administration incidents. These reflect the ongoing pressures in acute admissions.
- There is also a run on incidents involving antimicrobials but on review of these there are no specific trends.
- VTE risk assessments remain below the threshold continuously over the last 12 months. VTE committee have specific actions to address the compliance such as ensuring risk assessments are completed in Paediatrics, meetings around functionality of EPMA and risk assessments with DIS.

Complaints:

- Overall Trust performance with complaints 52%, target is above 90%. Only Care Group 2 and Corporate are meeting this target. Each Care Group meets with the Patient Experience Team weekly to address this performance and progress complaint investigations.

Deteriorating Patient:

- Observation (NEWS2) compliance across the York site remains an issue and currently stands at 83.8% within 1 hour staffing shortages are impacting on this too. The changes on Datix will also allow for better capture of the impact of staffing incidents with observations. There are now 8 points above the mean at York, which demonstrates special cause variation. Discussions with DIS are planned that are aimed to remove and amend areas currently being monitored such as community inpatient units, ICU, PACU etc. where stringent patient monitoring is already in

place. This issue is being escalated to Quality Committee from QPaS and the Deteriorating Patient Group.

Infection Prevention & Control:

- There have been a total of 17 Community Onset Healthcare Associated (COHA) + Hospital Onset Healthcare Associated (HOHA) *Clostridium difficile* cases for the month of April 2022. The Trust *C.difficile* trajectory for 2022/23 has not yet been set. Following the NHSE/I recommendations for improvement last year, the C. difficile meeting structure has been reviewed to ensure productivity and meaningful outputs from the meetings. There will be an internal cross-site C. difficile improvement group which will review each site’s position of C. difficile and actions to be completed within the improvement plan. This meeting will be held monthly. The C. difficile Improvement Group actions and escalations paper will go to TIPSG where external partners will be invited.
- The C. difficile improvement plan has been re-written with smaller actions grouped in broader headlines to facilitate follow up of completed and outstanding actions to be agreed at the Improvement Group and provide assurance at TIPSG.

Maternity:

- The number of women smoking at Booking in Scarborough has decreasing steadily from 21% in January to 16% in April.
- Labour ward co-ordinators at Scarborough have been unable to work supernumerary for 19% of the time in April, this figure has been increasing monthly. Discussed with labour manager, rotas checked and all shifts had staffing shortages. Birthrate plus also checked to look at what the acuity on delivery suit and within the unit was at the time. Labour ward manager to prepare a report.

Mortality:

- ED deaths are demonstrating special cause variation, with 8 points above the mean. A deep dive is to be undertaken looking into the ED deaths at York, as existing processes are in place to review all ED deaths at Scarborough.

Director Sponsors	James Taylor, Medical Director Heather McNair, Chief Nurse

Workforce

Last month it was reported that an increase in sickness absence rates for March was anticipated and indeed the latest validated sickness absence data shows that the absence rate in March 2022 was 6.58% which was an increase of 0.95% compared to the previous month. The SPC charts included within this report highlight that there has been special cause for concern with regards to the monthly sickness absence rates in each month since September 2021. Concerns remain about the impact that this level of sickness absence has on the welfare of our staff.

Workforce stability rates continue to fall; since April 2021 the rate has fallen from 90.89% to a rate of 85.97% in the year to the end of April 2022. Turnover rates have also increased from 7.80% to 11.60% over the same time period.

Work is continuing in terms of the Trust's response to the 2021 Staff Survey results, with a review and reprioritisation of the approach to staff engagement. Work is ongoing to review the 'Fix the Basics' ideas that have previously been suggested by staff but immediate actions have already been taken to update appraisal paperwork and training with the aim of improving experiences for our staff.

Author	Sian Longhorne, Deputy Head of Resourcing
Director Sponsor	Polly McMeekin, Director of Workforce & Organisation Development

Finance

The report for April 2022 marks the first of the new financial year 2022/23.

Trust financial plan

The financial plan for 2022/23 was submitted to and agreed by the Board at its 27th April 2022 meeting. The agreed plan is consistent with the system and individual provider plans submitted to NHSE&I during April 2022. The plan results in a deficit position of £11.8m for the Trust. The expectation from NHSE&I is a balanced position and there may be a requirement placed on the Trust to review the position in order to deliver a balanced plan.

Month 1 position

At the end of April 2022 the Trust is reporting an adjusted I&E position of a deficit of £1.018m against a planned deficit of £0.990m, placing it £0.028m behind plan. This is primarily driven by income being £0.143m ahead of plan and operational expenditure being £0.248m ahead of plan.

The Trust's compliance with the Better Payments Practice Code (BPPC) is currently averaging around 89% of suppliers being paid within 30 days.

Author	Richard Parker, Head of Financial Management
Director Sponsor	Andrew Bertram, Finance Director

Research & Development

Our key outcomes in the last month are as follows:

- One grant was submitted in the last month for a research funding others are in preparation
 - 59K to **Obstetric Anaesthetists' Association** the study is called ICalM - Intraoperative Calcium to reduce Maternal Haemorrhage:
- We have met again with the ICS to talk about how research will fit into their governance structure and how we can facilitate the ICS research objectives going forward, we are keen to be involved.

- We have arranged a critical friend review, a review by external R&D staff to review our services, governance and our processes, to see if there are any observations and opportunities for shared learning.
- We have held the third cross York strategic Research Committee this month, with local and regional research collaborators
- We have just closed the third round of fee waived PhDs along with University of St John. We have two very strong applicants going through to the full application stage
- Upcoming events- dates for your diaries
 - Health and Society Research Showcase at York St John University
29th June 2022 09:00-17:00

The programme is currently being drawn up, there will be showcase talks from Y&STH staff and YSJU staff followed by breakout groups with a focus on some joint key themes for both organisations for research. All interested parties should contact lisa.ballantine@york.nhs.uk

- Pint of Science is back and Luke Madge and Jillian Webster 2 of our PhD students are organisers

We are a very busy team!

Director Sponsor	Polly McMeekin Director of WOD

Operational Performance

Nationally, the COVID-19 Pandemic NHS Emergency Preparedness, Resilience and Response incident level moved to a level 4 national response on the 12th of January 2022. A level 4 national response is defined as “An incident that requires NHS England National Command and Control to support the NHS response. NHS England to coordinate the NHS response in collaboration with local commissioners at the tactical level”.

In response to the Omicron variant the Trust has continued to operate within its Pandemic Command and Control structure and as at the 9th of May there were 111 COVID-19 positive inpatients in our acute and community hospitals having peaked at 287 on the 30th of March 2022 (reported via Trust’s external SitRep submission).

The Trust has had 5,744 COVID-19 positive inpatients since 17th March 2020, with 4,676 patients discharged, sadly 966 patients have died. Since the beginning of July 2021 there have been 2,932 new COVID-19 positive inpatients and 352 deaths.

As at the 9th of May, York Hospital has one COVID-19 positive wards with two COVID-19 positive wards/areas at Scarborough Hospital. The majority of COVID-19 positive patients are not being treated for COVID-19 as their primary complaint. However, the need to manage high risk patients separately and cohort COVID-19 positive patients due to Infection Prevention Control (IPC) requirements creates flow (bed) issues and impacts on the Trust’s ability to admit elective patients as patients cannot be admitted onto wards where there are COVID-19 positive patients.

The Trust's COVID-19 surge plan is in place to respond to further requirements for additional beds.

Trust Planning

The workforce risk that the Trust highlighted as part of 2021-22 activity plan materialised to a greater extent than was anticipated and continued into April. This affected not just the Trust but all partners. NYCC, TEWV, YAS, Primary Care and Vocare who have all been operating at their highest level of escalation due to workforce pressures over the last six months, limiting the availability of support from the system to reduce delays to patients or support urgent care demand. Overall the Trust's sickness absence rate is 6.2% with 604 absent as at the 9th of May, 21% of the absences relate to COVID-19.

The pressure on medical staffing contributed to the cancellation of 247 outpatient clinics within fourteen days of the planned date and there were 163 elective patients cancelled by the Trust within forty eight hours of their intended surgery date due to non-clinical reasons. As in the previous COVID-19 'waves' cancer, urgent priority (P2) and long wait elective procedures are being prioritised.

Point of Delivery	April 2019 Outturn	April 2022 Actual	Variance	Proportion of April 2019 delivered in April 2022
First Outpatient Appts	13,619	11,628	-1,991	85%
Follow up Outpatient Appts	30,757	29,840	-917	97%
Ordinary Electives*	622	507	-115	82%
Day Cases	5,952	5,776	-176	97%

Compared to the activity outturn in April 2019 the Trust delivered the following levels of elective care activity:

*Ordinary Elective figures are based on discharge date.

April 2022 Performance Headlines:

- 70.8% of ED patients were admitted, transferred or discharged within four hours.
- The Trust reported 750 twelve hour Trolley Breaches.
- March 2022 saw challenging cancer performance with the Trust achieving one out of the eight core national standards however performance against the 14 Day Fast Track Cancer 62 Day Waits for first treatment (from urgent GP referral) and Cancer 62 Day Waits for first treatment (from urgent GP referral) improved compared to February 2022.
- 2,541 fifty-two week wait pathways have been declared for the end of April 2022.
- Seventy three 104+ week wait pathways have been declared for the end of April 2022. This number, as per national guidance, excludes those patients who have requested to defer their treatment. There were three such patients at the end of April 2022. The Trust therefore achieved the trajectory submitted as part of 2022-23 planning to have less than seventy six patients waiting at the end of April 2022.

- The Trust saw a decline against the overall Referral to Treatment backlog, with the percentage of patients waiting under eighteen weeks at month end decreasing from 59.4% in March 2022 to 58% at the end of April 2022.

Author(s)	Andrew Hurren, Operational Planning and Performance Manager Lynette Smith, Deputy Director of Operational Planning and Performance Steve Reed, Head of Community Services
Director Sponsor	Wendy Scott, Chief Operating Officer

Digital and Information Service

People

- The Interim CDIO (Andy Williams) continues to attend key meetings, including Board of Directors and to establish key working relationships across the organisation in line with new ways of working. Senior Leadership and Management Team meetings are being held to ensure the new structure and operating model, culture and values are being embedded. EPR Strategic Outline Case is being refreshed as part of alignment with the overall ICS EPR Strategy. This will need Financial and Commercial support to understand the impact on capital and revenue streams.
- Interviews for the permanent CDIO were carried out on 28th April and due HR process is being followed prior to announcement.
- A Head of Delivery has been appointed and due HR process is being followed prior to announcement.
- The new CTO (Luke Stockdale) started on 4th May and a structured handover from Simon Hayes is in progress to ensure safe transition of responsibilities.
- The new CNIO (Nik Coventry) is exploring where this role can ensure DIS keeps patient safety, clinical priorities and User Centred Design at the heart of everything we do.
- CPD Developer recruitment continues
- Congratulations to the team for their successful deployment of GP Connect integration with CPD; this marks a large milestone in information sharing across care sectors.
- The team are still heavily focussed on delivery of the Office 365, NHSmail and Teams solutions over the next period and support from colleagues in the organisation is appreciated at this time of heavy workload.

Processes

- IT Service management - have initiated the 12 action improvement plan, which covers a number of areas across service including abandoned calls, outstanding tickets, self-service, first time fix, call answering management. During quarters 2 and 3 of 2022 this will see a marked improvements on KPI's and user experience

- The team are also designing a new major incident process and communication/reporting set for all incidents that have significant impact on service (P1 and P2).
- The team are designing new processes for the management of IT incidents and requests

Technology

- The team are about to embark upon a discovery exercise regarding IT assets, licenses and contracts (Software and maintainence)
- Infrastructure - the team are close to completing the migration to the upgraded windows 10 software.
- Throughout quarters 1 and 2 the end user team will be looking to deploy circa 2000 new devices (laptops and desktops) in to the estate to refresh 30% of the aged devices across the Trust
- The team continue to plan in the work required to make major changes to our data centres, network and server estate, with delivery starting in quarter 2
- Enabling solutions - the team are active in the delivery of the 365 solution (365 client, NHS mail and Teams) across the Trust, with significant work taking place in quarter 2
- Application Development - the team continue to deliver projects to underpin the Trust's portfolio, with a key success in the past week, with the successful roll out of GPConnect
- The team continue to plan the integration and delivery of the major priority programmes for 22/23;
 1. Laboratory Information Management System
 2. Maternity IT System (MITS)
 3. Cancer Information System (Somerset)
 4. Patient Held Record (PKB) Phase 2
- The constraint in our ability to develop and in some cases maintain CPD further necessitates progress in move away from it. This is something we are doing incrementally through replacing the specialist elements with third party “off the shelf” systems whilst in parallel progressing with the ICS business case with the Frontline Digitisation programme to secure the funds for a bigger and more ambitious move. We are exploring what development capacity we will have left to move towards HIMSS Level 5 by December 2023 as per Secretary of State target in parallel.

Integrated Business Report

Quality and Safety, Workforce, Finance, Research and Development, Operational Performance,
Digital and Information Service.

April-2022

Produced May-2022

The Board Assurance Framework is structured around the Trust's three Strategic Goals:

To deliver safe and high quality patient care as part of an integrated system

To support an engaged, healthy and resilient workforce

To ensure financial stability

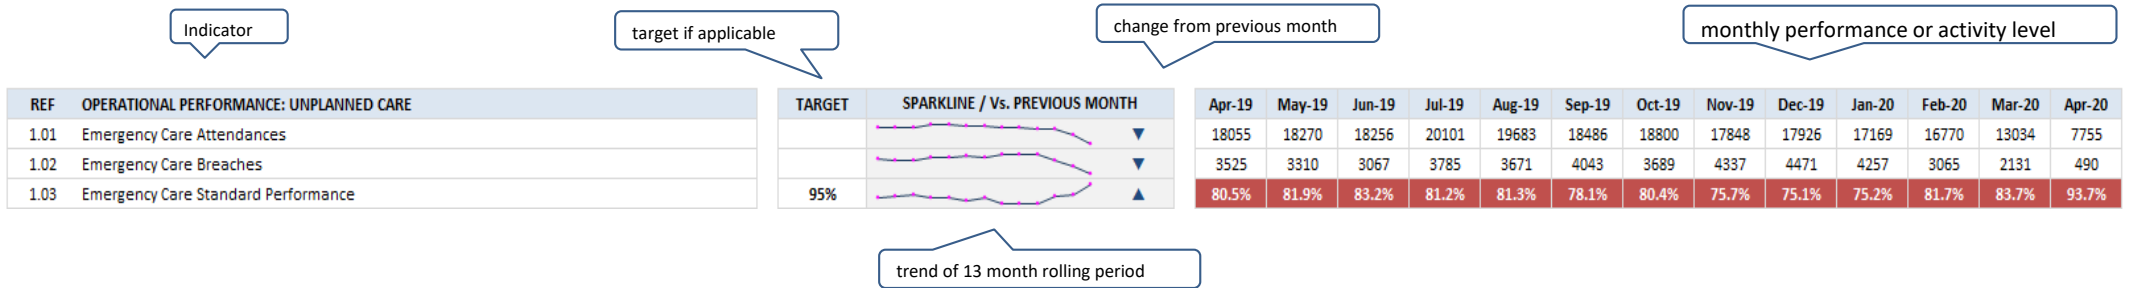

Report produced by:
Information Team

Integrated Performance Report : April-2022

Understanding the Report

1. Operational Performance Summary

This section provides a summary of key performance targets for NHSI, Quality, Workforce and Finance, plus activity data. The target is either the monthly standard and performance is coloured according to achievement. This should be read in conjunction with overall trends and not taken in isolation. The table will show performance for a 13 month rolling period, which is also displayed in the snapshot overview. Change from previous month is displayed using arrow, but again this must be read in conjunction with trend analysis.

2. Focus Sections

This section provides a summary of key performance targets for NHSI, Quality, Workforce and Finance, plus activity data. The target is either the monthly standard and performance is coloured according to achievement. This should be read in conjunction with overall trends and not taken in isolation. The table will show performance for a 13 month rolling period, which is also displayed in the snapshot overview. Change from previous month is displayed using an arrow, but again this must be read in conjunction with trend analysis. There is also a Red/Green indicator to ascertain where the Care Group is passing/failing target at a service level, where applicable.

QUALITY AND SAFETY REPORT

April-2022

Produced May-2022

The Board Assurance Framework is structured around the Trust's three Strategic Goals:

To deliver safe and high quality patient care as part of an integrated system

To support an engaged, healthy and resilient workforce

To ensure financial stability

Report produced by:
Information Team

Quality and Safety Report: April-2022

Executive Summary

Trust Strategic Goals:

- to deliver safe and high quality patient care as part of an integrated system
- to support an engaged, healthy and resilient workforce
- to ensure financial sustainability

Purpose of the Report:

To provide the Board with an integrated overview of Quality and Safety indicators within the Trust

Executive Summary:

Key discussion points for the Board are:

Incidents:

- The incidence of both pressure ulcers and falls remains high although there has been a slight improvement in month. Workforce factors continue to be a contributing factor and this has impacted on both the completion of timely risk assessments and delivery of care. Staffing concerns are highlighted daily through the Associate Chief Nurse of the Day so that additional mitigations can be instigated where possible. Datix has been amended to better capture the impact of these incidents. A new Care Needs Summary sheet has been implemented to provide an 'at a glance' view of care required at the bedside. This will help staff, especially those who are redeployed or temporary staff, to quickly identify the level of risk for patients. Priorities for both falls and pressure ulcers have been reviewed and the Trust-wide improvement plans are being refreshed in line with current themes. There is insufficient resource within the Tissue Viability Team to deliver ward-based training and the lack of a Falls Advanced Clinical Specialist is limiting the targeted work previously delivered at ward level. This issue has been raised to Chief Nurse and a paper requesting resource is been taken to Executive Committee in May.
- There was a new Never Event declared in April, now 4 in total over the last 12 months. Each incident has a specific investigation under the Serious Incident Framework.

Medication Incidents/Pharmacy:

- Whilst all incident types remain within normal variation there continues to be a run above average for both prescribing and administration incidents. These reflect the ongoing pressures in acute admissions.
- There is also a run on incidents involving antimicrobials but on review of these there are no specific trends.
- VTE risk assessments remain below the threshold continuously over the last 12 months. VTE committee have specific actions to address the compliance such as ensuring risk assessments are completed in Paediatrics, meetings around functionality of EPMA and risk assessments with DIS.

Complaints:

- Overall Trust performance with complaints 52%, target is above 90%. Only Care Group 2 and Corporate are meeting this target. Each Care Group meets with the Patient Experience Team weekly to address this performance and progress complaint investigations.

Deteriorating Patient:

- Observation (NEWS2) compliance across the York site remains an issue and currently stands at 83.8% within 1 hour staffing shortages are impacting on this too. The changes on Datix will also allow for better capture of the impact of staffing incidents with observations. There are now 8 points above the mean at York, which demonstrates special cause variation. Discussions with DIS are planned that are aimed to remove and amend areas currently being monitored such as community inpatient units, ICU, PACU etc. where stringent patient monitoring is already in place. This issue is being escalated to Quality Committee from QPaS and the Deteriorating Patient Group.

Infection Prevention & Control:

- There have been a total of 17 Community Onset Healthcare Associated (COHA) + Hospital Onset Healthcare Associated (HOHA) Clostridium difficile cases for the month of April 2022. The Trust C.difficile trajectory for 2022/23 has not yet been set. Following the NHSE/I recommendations for improvement last year, the C. difficile meeting structure has been reviewed to ensure productivity and meaningful outputs from the meetings. There will be an internal cross-site C. difficile improvement group which will review each site's position of C. difficile and actions to be completed within the improvement plan. This meeting will be held monthly. The C. difficile Improvement Group actions and escalations paper will go to TIPSG where external partners will be invited.
- The C. difficile improvement plan has been re-written with smaller actions grouped in broader headlines to facilitate follow up of completed and outstanding actions to be agreed at the Improvement Group and provide assurance at TIPSG.

Maternity:

- The number of women smoking at Booking in Scarborough has decreasing steadily from 21% in January to 16% in April.
- Labour ward co-ordinators at Scarborough have been unable to work supernumerary for 19% of the time in April, this figure has been increasing monthly. Discussed with labour manager, rotas checked and all shifts had staffing shortages. Birthrate plus also checked to look at what the acuity on delivery suit and within the unit was at the time. Labour ward manager to prepare a report.

Mortality:

- ED deaths are demonstrating special cause variation, with 8 points above the mean. A deep dive is to be undertaken looking into the ED deaths at York, as existing processes are in place to review all ED deaths at Scarborough.

Recommendation:

The Board is asked to receive the report and note any actions being taken.

Author(s): Liam Wilson, Lead Nurse Patient Safety

Director Sponsor: James Taylor, Medical Director
Heather McNair, Chief Nurse

TRUST BOARD REPORT : April-2022

QUALITY AND SAFETY SUMMARY: (i)

REF	SERIOUS INCIDENTS (data is based on SI declaration date except given final report)	Sparkline / Previous Month	Apr-21	May-21	Jun-21	Jul-21	Aug-21	Sep-21	Oct-21	Nov-21	Dec-21	Jan-22	Feb-22	Mar-22	Apr-22
1.01	Number of SI's reported		14	12	20	21	11	13	16	25	17	10	14	12	13
1.02	% SI's notified within 2 working days of SI being identified		100%	100%	100%	100%	100%	100%	100%	100%	100%	100%	100%	100%	100%
1.03	Number of SIs where Duty of Candour is Applicable (Moderate or Above Harm)		14	11	18	15	10	10	14	20	14	9	14	12	13
1.04	Number of SIs Where Stage 2 (Written) Duty Of Candour is Outstanding (Moderate or Above Harm)		0	0	1	0	1	0	0	0	1	0	0	0	0
1.05	% Compliance with Stage 2 (Written) Duty of Candour for Serious Incidents (Moderate or Above Harm)		100%	100%	94%	100%	90%	100%	100%	100%	93%	100%	100%	100%	100%
1.06	-Invitation to be involved in Investigation (Clinical SIs Only)		3	2	10	11	6	5	7	10	4	2	2	2	2
1.07	-Given Final Report (If Requested - Clinical SIs Only - based on Investigation End Date)*		4	1	7	2	3	11	8	4	4	5	5	3	0

The harm for incidents reported within the last week of the reporting period have not been validated as investigations are ongoing. The degree of harm may change from the reporter's initial depending on the outcome of the investigation.

REF	DUTY OF CANDOUR (All Incidents - data is based on the date reported)	Target	Sparkline / Previous Month	TOTAL (For Incidents Reported Between 01/05/21 and 17/04/22)
1.10	Incident Graded Moderate or Above			369
1.11	Stage 1 - Verbal Apology Given			346
1.12	Stage 2 - Written Apology Given			336
1.14	% Compliance with Stage 2 (Written) Duty of Candour			91%
1.15	Stage 3 - Final Written Summary Due (for incidents between May and Oct 21)			154
1.16	Stage 3 - Final Written Summary Completed (for incidents reported Between May and Oct 21)			134

Note: Duty of Candour data is based on the dates incidents were reported, not the incident date, so the number of incidents graded as moderate or above harm in the DoC data may be different to those in the incident data. All harms of moderate or above are subject to ongoing validation, so degree of harm data is subject to change. In exceptional cases, it may not be possible to provide letters to patients / relatives / carers, so percentage compliance is calculated on the number of incidents where the DoC process has been signed off signed as complete.

The Trust introduced a three stage Duty of Candour process on 18 January 21, which requires a final written summary of the investigation findings and actions taken being sent within 6 months of the incident being reported. Data on the third stage of Duty of Candour is now included above. However, compliance with Duty of Candour continues to be measured as compliance with Stage 2 where an initial written apology is provided, due to the long time period for completion of the third stage.

REF	CLAIMS	Sparkline / Previous Month	Apr-21	May-21	Jun-21	Jul-21	Aug-21	Sep-21	Oct-21	Nov-21	Dec-21	Jan-22	Feb-22	Mar-22	Apr-22
1.20	Number of Negligence Claims		11	11	8	13	12	16	10	17	13	15	17	13	13
1.21	Number of Claims settled per Month		4	1	1	1	13	8	3	3	3	1	7	4	4
1.22	Amount paid out per month		739,500	287,582	20,000	9,500	1,406,144	103,700	1,040,000	73,946	115,000	52,500	314,500	106,204	331,000
1.23	Reasons for the payment		Accepted Liability	Accepted Liability	Accepted Liability	Accepted Liability	Accepted Liability	Accepted Liability	Accepted Liability	Accepted Liability	Accepted Liability	Accepted Liability	Accepted Liability	Accepted Liability	Accepted Liability

Please note that damages data may be adjusted some time after a claim has been settled if there is a delay in agreeing a final settlement, hence data is subject to change.

Significant work has recently been undertaken by care groups to identify learning points from all claims settled in the last year. In order to capture this information in the weekly report to the Quality & Safety meeting the actual date of settlement has been omitted from the datix claim record until such point the learning information has been available for circulation. This has resulted in a slight backlog of claims settlement dates being recorded on Datix, hence the apparent rise in the number of claims settled in August and September. Going forward the learning information will be available at a much earlier stage, before settlement is agreed, and so the settlement dates will be more accurately reflected.

REF	MEASURES OF HARM	Target	Sparkline / Previous Month	Apr-21	May-21	Jun-21	Jul-21	Aug-21	Sep-21	Oct-21	Nov-21	Dec-21	Jan-22	Feb-22	Mar-22	Apr-22

1.39	Never Events	0		0	0	0	0	0	0	0	2	1	0	0	0	1

As at the beginning of November, the degree of harm is being determined by the incident reporter at the time of reporting rather than being determined during the investigation. The degree of harm for incidents reported within the last week of the reporting period have not been validated as investigations are ongoing. The degree of harm may change from the reporter's initial depending on the outcome of the investigation.

Incident reporting monitoring now shows the number of investigations resulting in no or minor/low harm where the investigation has not been completed within 1 month of the incident being reported (excluding incidents which are subject to more in-depth investigation via the SI or 72 Hour reporting process. This data also excludes incidents referred to external organisations for investigation). The data shows the position for the last 11 months in the reporting period (as incidents in the most recently reported month may not yet be completed).

* VTE risk assessment percentage from Sep-21 is now calculated using the VTE Assessments dashboard. New rules have been agreed with the Pharmacy team.

TRUST BOARD REPORT : April-2022

QUALITY AND SAFETY SUMMARY: (ii)

REF	PRESSURE ULCERS***
1.40	Number of Category 2
1.41	Number of Category 3
1.42	Number of Category 4
1.43	Total no. developed/deteriorated while in our care (care of the org) - acute
1.44	Total no. developed/deteriorated while in our care (care of the org) - community

5	0	2	2	2	1	2	5	2	6	6	3	5
0	0	0	1	0	0	0	0	0	0	0	0	0

Note *** and **** - falls and pressure ulcers are subject to ongoing validation. The degree of harm for incidents reported within the last week of the reporting period have not been validated as investigations are ongoing. The degree of harm may change from the reporter's initial depending on the outcome of the investigation. Inpatients developing pressure ulcers in Community Hospitals are now counted in the Acute care data above (as the care they receive is the same as patients on acute wards) so this data has been recalculated. Community pressure ulcers includes the RATS and DN Teams.

HIGHLIGHTS FOR BOARD TO NOTE :

It is noted that there is poor NEWS 1 hour compliance on the York site, this has been ongoing. As previously mentioned this and has been discussed at the deteriorating patient group in reference to Observation compliance on the wards, some actions have been put in place.

The out of Hours bleep filtering is due to go live in June.

TRUST BOARD REPORT : April-2022

QUALITY AND SAFETY: CARE OF DETERIORATING PATIENT

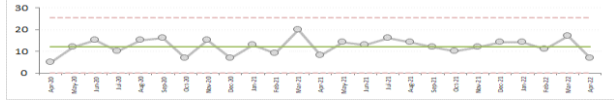

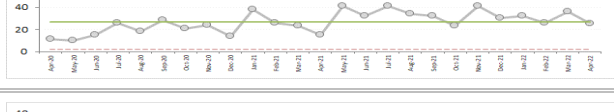

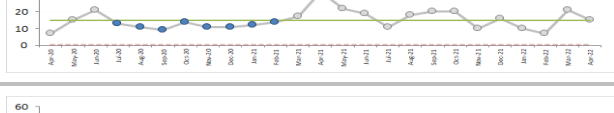

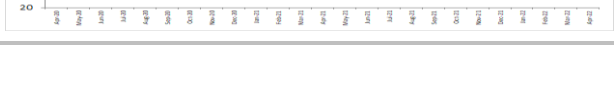

HIGHLIGHTS FOR BOARD TO NOTE :

Cardiac arrests numbers at both sites remains static around the median, no significant change from last month.
 Outreach workload remains similar at the Scarborough site. There is reduced Outreach calls at the York site which has continued over the last 3 months.

TRUST BOARD REPORT : April-2022

QUALITY AND SAFETY: MEDICATION INCIDENTS

Apr-22	METRIC :	TARGET :	vs LM :	
5	10.20 Medication Incidents Resulting in Moderate Harm, Serious/Severe Harm or Death	-	3 ↑	
7	10.21 Insulin Incidents	-	-10 ↓	
19	10.22 Antimicrobial Incidents	-	4 ↑	
17	10.23 Opiate Incidents	-	-10 ↓	
14	10.24 Anticoagulant Incidents	-	1 ↑	
25	10.25 Missed Dose Incidents	-	-11 ↓	
15	10.26 Discharges Incidents	-	-6 ↓	
33	10.27 Prescribing Errors	-	-2 ↓	
18	10.28 Preparation and Dispensing Incidents	-	4 ↑	
69	10.29 Administrating and Supply Incidents	-	-5 ↓	

HIGHLIGHTS FOR BOARD TO NOTE :

There were 152 medication incidents reported in April

There were three incidents categorised as moderate harm. Two incidents are likely to be downgraded following initial investigations. The third related to an in-patient who refused their normal anti epileptics, this was not escalated to the medical team and the patient developed seizures requiring ITU admission and ventilation. A PSIR is in process

Whilst all incident types remain within normal variation there continues to be a run above average for both prescribing and administration incidents. These reflect the ongoing pressures in acute admissions. There is also a run on incidents involving antimicrobials but on review of these there are no specific trends.

TRUST BOARD REPORT : April-2022

QUALITY AND SAFETY : MORTALITY

HIGHLIGHTS FOR BOARD TO NOTE :

In April 2022 the top 3 causes of death were Pneumonia, Acute Ischaemic Stroke and Covid-19. There were 5 deaths that mentioned Covid 19 as 1a Cause of Death. In April , overall deaths increased in the Emergency Department and the community, but declined in the Acute sites.

The number of deaths per 1000 bed days was calculated and is shown below:

- April 2021 - 7.15 per 1000 bed days
- May 2021 - 7.10 per 1000 bed days
- June 2021 - 6.90 per 1000 bed days
- July 2021 - 6.76 per 1000 bed days
- August 2021 - 8.55 per 1000 bed days
- September 2021-8.42 per 1000 bed days
- October 2021 - 8.78 per 1000 bed days
- November 2021 - 9.05 per 1000 bed days
- December 2021- 12.63per 1000 bed days
- January 2022- 7.03 per 1000 bed days
- February 2022 - 4.46 per 1000 bed days
- March 2022 - 6.69 per 1000 bed days
- April 2022- 5.71 per 1000 bed days

When compared to April 2021, the number of deaths per 1000 bed days has Decreased in April 2022.

In April 2022 there were 6 Structured Judgement Casenote Reviews (SJCR's) commissioned. The SJCR's requested were as a result of the following; 6 x medical examiner review.

TRUST BOARD REPORT : April-2022

PATIENT EXPERIENCE: NEW COMPLAINTS AND PALS CASES

New complaints and PALS cases by care group and site

Care Group	COMPLAINTS				PALS			
	York	Scarb	Brid	Total	York	Scarb	Brid	Total
CG1	14	0	0	14	10	0	0	10
CG2	0	10	0	10	0	4	0	4

Corporate	1	0	0	1	0	0	0	0
Total	33	14	2	49	27	7	0	34

Main themes

Complaints

- Care needs not adequately met
- Communication with relatives/carers
- Staffing levels
- Delay or Failure of Medical Assessment
- Attitude of nursing staff/midwives

PALS

- Communication with relatives/carers
- Attitude of nursing staff/midwives
- Emergency Dept/MIU waiting time
- Care Pathway Issues
- Communication - Clinical Advice

Themes are discussed at the PESG and care groups continue to provide evidence of learning and service improvements as a result of feedback.

PATIENT EXPERIENCE: CLOSED CASES

Proportion of closed complaints by outcome

Closed Complaints

Care Group	<30		30-50		51-100		>100		Total Closed	Total Average of No of Days	% Within Target
	Closed	Average of No of Days	Closed	Average of No of Days	Closed	Average of No of Days	Closed	Average of No of Days			
CG1	7	15	9	40	1	73	0	0	17	32	41%

Formatting and benchmarking amended April 2021 to reflect the most current National averages. Insert of Regional figures from the Regional dashboard where available. These will be changed when new quarterly figures are published.

WORKFORCE PERFORMANCE REPORT

April-2022

Produced May 2022

The Board Assurance Framework is structured around the Trust's three Strategic Goals:

To deliver safe and high quality patient care as part of an integrated system

To support an engaged, healthy and resilient workforce

To ensure financial stability

Report produced by:
Information Team

Workforce Performance Report : April 2022

Executive Summary

Trust Strategic Goals:

- to deliver safe and high quality patient care as part of an integrated system
- to support an engaged, healthy and resilient workforce
- to ensure financial sustainability

Purpose of the Report:

To provide the Board with an integrated overview of Workforce Performance within the Trust

Executive Summary:

Key discussion points for the Board are:

Last month it was reported that an increase in sickness absence rates for March was anticipated and indeed the latest validated sickness absence data shows that the absence rate in March 2022 was 6.58% which was an increase of 0.95% compared to the previous month. The SPC charts included within this report highlight that there has been special cause for concern with regards to the monthly sickness absence rates in each month since September 2021. Concerns remain about the impact that this level of sickness absence has on the welfare of our staff.

Workforce stability rates continue to fall; since April 2021 the rate has fallen from 90.89% to a rate of 85.97% in the year to the end of April 2022. Turnover rates have also increased from 7.80% to 11.60% over the same time period.

Work is continuing in terms of the Trust's response to the 2021 Staff Survey results, with a review and reprioritisation of the approach to staff engagement. Work is ongoing to review the 'Fix the Basics' ideas that have previously been suggested by staff but immediate actions have already been taken to update appraisal paperwork and training with the aim of improving experiences for our staff.

Recommendation:

The Board is asked to receive the report and note any actions being taken.

Author(s): Sian Longhorne, Deputy Head of Resourcing

Director Sponsor: Polly McMeekin, Director of Workforce & Organisation Development

TRUST BOARD REPORT : April-2022

WORKFORCE : SICKNESS ABSENCE RATE

HIGHLIGHTS FOR BOARD TO NOTE :

The absence trends on monthly sickness figures reveal that the last time we were under our sickness target (3.9%), was at the end of March 2021. Following this period, there has been special cause for concern with the monthly absence rates since September 2021. These flags for concern have been shown through the SPC chart analysis. Although daily SitRep logs are indicating a reduction in absence during April, staff welfare remains a concern and it is anticipated the the absence data will continue to illustrate this issue.

The latest validated absence figures showed a sickness absence rate of 6.58% for the month of March 2022. This was an increase of 0.95% from the previous validated figures recorded for February. This increase was indeed anticipated, as mentioned in last month's report, based on figures recorded through the daily logs.

Anxiety, stress, depression and other psychiatric illnesses remain the reasons accounting for the largest proportion of absences (26.4%). This absence reason was followed by infectious diseases (mainly covid), accounting for 16.4% of absences. Musculoskeletal problems, which include back problems, accounted for 13.4% of absences in March.

TRUST BOARD REPORT : April-2022

WORKFORCE : RETENTION RATE

HIGHLIGHTS FOR BOARD TO NOTE :

The trust stability rate has fallen significantly since last month. In the year to the end of April 2022, the stability rate was 85.97% - this was a 1.39% reduction on the previous month's figure and compares to a figure of 90.89% in the year to the end of April 2021.

Turnover rates (which are a significant factor in stability) have increased from 7.80% in the year to the end of April 2021 to 11.60% in the year to the end of April 2022. As has previously been reported, turnover rates for clinical staff are particularly high currently for Allied Health Professionals (15.17%) and Additional Clinical Services (12.35%). The turnover rate for Administrative and Clerical staff is also higher than the Trust figure at 13.59%. By area, Corporate Functions have the highest turnover rate at 13.64% and Care Groups 3, 5 and 6 also have rates above 13%.

Wellbeing & Retention Updates

The Staff Wellbeing Psychology service is currently preparing some webinars looking at burnout, as evidence, including staff survey results indicate that this is currently a significant issue for staff. The webinars will look into what burnout is, how it might feel, and some ways to manage it.

Evidence also suggests that there is discontent across the national health service workforce, with staff thinking of leaving the NHS completely. There are plans to run webinars for staff who might be considering their options. These webinars will include stress management, listening and engagement to seek to prevent leavers. This is in addition to wider staff engagement as detailed under the Staff Survey section below.

TRUST BOARD REPORT : April-2022

WORKFORCE : APPRAISAL COMPLIANCE

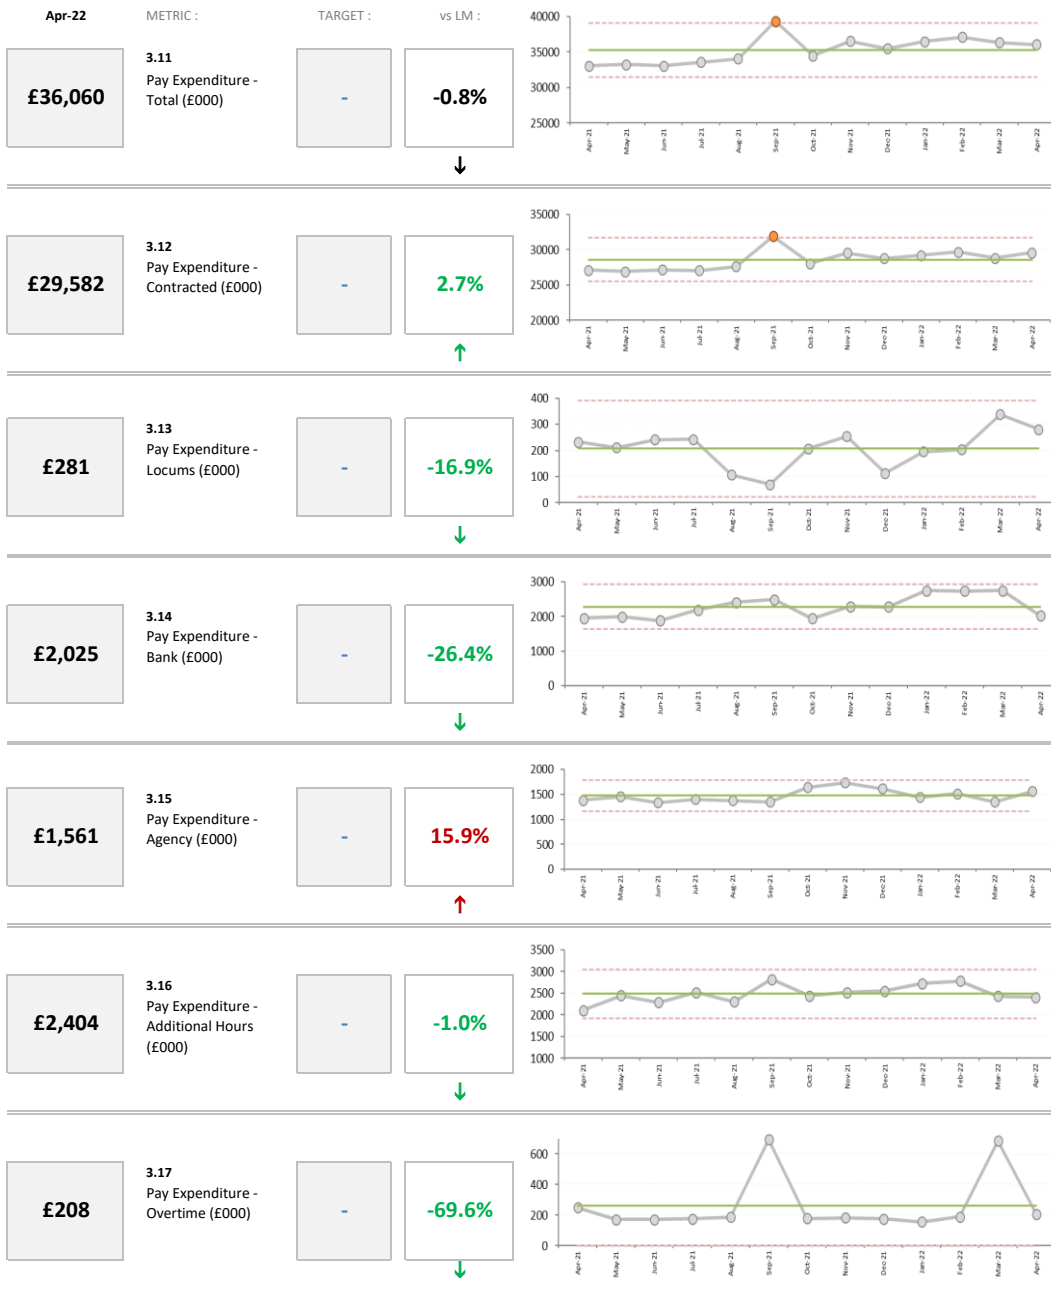

HIGHLIGHTS FOR BOARD TO NOTE :

The 2022 window for appraisals opened in April for Directors and Senior Managers and therefore appraisal compliance activity is being reported again through this report. At the end of April the appraisal compliance rate was 0.31% but we expect this to improve significantly over the coming months as the window is now open for all staff until the end of September 2022.

TRUST BOARD REPORT : April-2022

WORKFORCE : PAY EXPENDITURE (£000)

HIGHLIGHTS FOR BOARD TO NOTE :

The current overall vacancy rate for the registered nursing group is 10.11% (233.48 FTE), at the York site the rate is 9.14% (150.13 WTE) whilst at the Scarborough site the rate is 12.51% (83.35 WTE).

Activity around Consultant recruitment remains high and in the first four months of this calendar year there have been 24 new consultants commence employment with the Trust with a further 16 having agreed start dates before the end of the year. The graph below shows numbers of new Consultant starters with the Trust over the last four financial years (these numbers exclude Consultants who have retired and returned and therefore numbers reflect genuine new starters). Recruitment activity and other factors (e.g. internal promotions, changes to FTE etc) have resulted in growth in Consultant numbers from 361 (342.87 FTE) in April 2018 to 401 (372.53 FTE) in April 2022. This represents more than an 11% growth in the Consultant workforce (based on headcount) over this period.

Demand for temporary nurse significantly reduced in April compared to the previous month. The total shift requests for April equated to 693 FTE nursing and HCA staff. 46% of these requests were filled by our internal bank which was a slight increase from the previous month whilst agency fill rate remained at 12% for the third month in a row. Overall of the temporary staffing that was requested, shifts equating to 288 FTE remained unfilled.

Medical and dental temporary staffing data for April shows that shifts equating to 94.15 FTE were filled by our internal bank of employees. Following a tendering process in 2021 where we appointed Medacs Healthcare as our new Master Vendor and Direct Engagement provide, we can confirm that transition between providers went ahead on Monday 25th April 2022.

We look forward to working closely with Medacs to bring the Organisation cost savings and efficiencies on our Medical Agency spend over the duration of the contract.

We anticipate an increase in Direct Engagement bookings, and our expectation is that such bookings to increase from 70%+ of our total bookings to over 90% in time. We also expect to see a reduction in Agency commission brought through the use of Medacs rate card, which keeps strict control over Agency margins, and with their "reduce or replace" initiative, we hope to see a decrease in cost for the high cost bookings we have across the Organisation.

The charts opposite show spikes in overtime expenditure in September 21 and March 22. This doesn't reflect true increases in spend at these times but is the result of technical financial management of the annual leave payments made relating to additional hours worked in the 2021/22 year.

TRUST BOARD REPORT : April-2022

WORKFORCE : STATUTORY AND MANDATORY TRAINING AND EDUCATION

HIGHLIGHTS FOR BOARD TO NOTE :

Statutory and Mandatory Training

There is currently a focus on compliance with life support and safeguarding programmes in particular as subjects which are below target. In respect of the Basic Life, Basic Paediatrics Life and Advanced Life courses, subject leads have planned extra course dates which should help improve completions while the Safeguarding Team are seeing progress towards improved compliance rates for Mental Capacity Act and Safeguarding Children training.

Leadership Development

The Trust continues to promote and support leadership and management development across all staff groups, levels and backgrounds. The self-directed learning offered through the new internal, 'leadership and management journey', programme allows staff to choose from both management & leadership modules appropriate to their current role and previous learning. 53 staff have attended introduction sessions since January 2022 with very positive evaluation to date.

The Trust's established internal leadership programmes continue to attract applicants with cohorts of First Steps in Leadership, Emerging Leaders and Senior Leaders starting May/June all fully booked. Further cohorts will continue. 118 members of staff attended the established programmes April 2021 to March 2022

Following excellent nominations from various clinical areas, Ward 15 has recently been successful in being selected to take part in a pilot study 'Lightening the Load' offered by the Improvement Academy; this study is a follow on to the 'Beyond Demoralised' research report published by the Improvement Academy. The learning from this initiative will be shared more widely across the organisation.

Many teams throughout the organisation will soon be participating in the 'Happier Working Lives' programme led by NHS Elect which builds on the Institute for Healthcare Improvement's 'Joy at Work' framework.

The Trust is launching a supportive network opportunity for new consultants starting in May. It brings together those who have recently joined the organisation to welcome them to the Trust and support their induction and development, co-creating a series of sessions exploring their challenges, sharing successes and building supportive networks.

Apprenticeships

The Trust is working towards enrolling four of our staff on Health Care Science apprenticeships (Assistant and Practitioner programmes) with Sheffield College and York St John University. The Trust currently has 230 apprentices on a range of clinical and non-clinical programmes, spanning roles from entry level to senior management.

Audit

The Workforce and OD directorate has recently received the outcomes of three internal audits, all of which were given an outcome of significant assurance - Incremental Pay Progression Follow Up, Health and Wellbeing and Working Time Directive (WTD) Follow Up.

Staff Benefits update

A free service has been introduced, which enables Trust staff to swap school uniforms that are no longer needed. The uniform swap is a great way to help recycle old clothes and save money.

Utilising the Staff Benefits website, adverts will be added outlining what is available, and staff can then contact the advertiser. Further adverts will appear on the Staff Benefits social media and newsletter.

Visa delays and international recruitment

The trust is experiencing delays in the timely arrival and commencement of employment for internationally recruited nurses. This is due to the longer than usual delays with the UK Visas and Immigration service; this is the result of priority to the service currently being given to Ukrainian refugees. As a direct result, any new recruits in need of a visa to work in the UK are facing delays of 6 - 7 weeks before the appropriate documentation is granted - this is a process which ordinarily takes around 3 weeks. This is having an impact on the nurses who would usually arrive in cohorts and begin their OSCE preparation together, consequently impacting the time taken to become appropriately registered and able to work as a band 5 nurse. In response to this challenge the Trust is working closely with individuals impacted by this to ensure they are able to join alternative cohorts as appropriate.

Staff survey

The Trust is required to appoint a new external contractor to deliver the 2022 staff survey. It is intended to meet with potential provider bidders in July 2022 with the aim of awarding a three year contract and an option to extend for two years depending on performance. The 2022 staff survey will go live in September.

Following the 2021 the Staff Survey results the Trust is reviewing and reprioritising its approach to staff engagement; work is ongoing to review the 'Fix the basics' ideas that were put forward by staff through #OurVoiceOurFuture, the online platform which was supported by Clever Together. Whilst it is acknowledged that this work was delayed due to the Covid pandemic we will refresh through communication channels the work that has been completed whilst we look to achieve more. Based on the feedback from staff and our investment in staff engagement, we have updated the Trust name to make it more inclusive, launched new, co-designed values and behaviours and established three staff networks which are now active in the organisation. We have appointed to a new Equality, Diversity and Inclusion Lead position for the Trust and work is actively on going designing and developing the new intranet for staff which will be available during the summer of 2022, this will enable numerous other ideas and requests to be completed. The Trust has improved its health and wellbeing offer to staff throughout the pandemic but feedback demonstrates that more communication is needed around this offer and exploration of further options is still required. All of the Trust sites are now smoke free, something staff members felt strongly about, and we have updated signage across the sites, notwithstanding the ongoing building works. As an immediate response to the recent staff survey results we have updated the appraisal paperwork and training in hope that this will improve the experience for staff members. Following a focused Board Session during May we will have an updated Employee Engagement plan, developing further the improvements through #OurVoiceOurFuture.

FINANCE PERFORMANCE REPORT

April-2022

Produced May-2022

The Board Assurance Framework is structured around the Trust's three Strategic Goals:

To deliver safe and high quality patient care as part of an integrated system

To support an engaged, healthy and resilient workforce

To ensure financial stability

Finance Performance Report : April-2022

Executive Summary

Trust Strategic Goals:

- to deliver safe and high quality patient care as part of an integrated system
- to support an engaged, healthy and resilient workforce
- to ensure financial sustainability

Purpose of the Report:

To provide the Board with an integrated overview of Finance Performance within the Trust

Executive Summary:

Key discussion points for the Board are:

The report for April 2022 marks the first of the new financial year 2022/23.

Trust financial plan

The financial plan for 2022/23 was submitted to and agreed by the Board at its 27th April 2022 meeting. The agreed plan is consistent with the system and individual provider plans submitted to NHSE&I during April 2022. The plan results in a deficit position of £11.8m for the Trust. The expectation from NHSE&I is a balanced position and there may be a requirement placed on the Trust to review the position in order to deliver a balanced plan.

Month 1 position

At the end of April 2022 the Trust is reporting an adjusted I&E position of a deficit of £1.018m against a planned deficit of £0.990m, placing it £0.028m behind plan. This is primarily driven by income being £0.143m ahead of plan and operational expenditure being £0.248m ahead of plan.

The Trust's compliance with the Better Payments Practice Code (BPPC) is currently averaging around 89% of suppliers being paid within 30 days.

Recommendation:

The Board is asked to receive the report and note any actions being taken.

Author(s): Graham Lamb, Deputy Finance Director

Director Sponsor: Andrew Bertram, Finance Director

Date: May 2022

TRUST BOARD REPORT : April-2022

Month 1 Summary Position

The table opposite and the graphs on the following pages show the plan for the whole of 2022/23. The Board of Directors approved the plan at their meeting in April which presents a deficit of £11.8m. NHSE/I are expecting the Trust to produce a balanced plan and there may be a requirement on the Trust to further refine the plan. For the period ending 30th April 2022, the Trust is reporting an adjusted I&E deficit of £1.018m against a planned deficit of £0.990m

Income is £0.143m ahead of plan, resulting primarily from excluded drugs and devices, Research and Development and Education and Training income being ahead of plan. This is partially offset by other non clinical income being behind plan.

Operational expenditure is £0.248 ahead of plan. This is largely due to a shortfall in delivery against the CIP target offset by pay expenditure being behind plan.

Matters of Concern and Risks to Escalate	Major Actions Undertaken and Work in Progress
1. The plan for 2022/23 has been approved by the Board and submitted to NHSE/I. The plan is a deficit of £11.8m; the expectation from NHSE/I is a balanced position. There may be a requirement placed on the Trust to further review and refine the plan	
Positive Updates and Assurance	Decisions Made and Decisions Required of the Board
1. The Trust has delivered to its I&E plan in April. 2. The Capital programme is currently £230k behind plan with a reported spend of £537k vs a plan of £770k at M1. 3. The cash position at the end of April was £51.8m	1. 2022/23 plan approved by the Board.

Highlights for the Board to Note:

	Plan for Year	Plan for Year-to-date	Actual Year-to-date	Forecast for Year
Capital Service Cover (20%)				
Liquidity (20%)				
I&E Margin (20%)				
I&E Margin Variance From Plan (20%)				
Agency variation from Plan (20%)				
Overall Use of Resources Rating				

Other Financial Issues:

Metrics 6.2 through 6.24 are not being actively reviewed by NHSE/I due to the operation of the current emergency financial regime. When normal operation resumes it is expected these will remain key assessment metrics. 6.24 showing our agency spend against plan remains a live assessment metric and, for the year we used slightly less agency staff than planned.

The Trust's compliance with the Better Payments Practice Code (BPPC) is currently averaging around 89% of suppliers being paid within 30 days.

RESEARCH AND DEVELOPMENT REPORT

April-2022

Produced May-2022

The Board Assurance Framework is structured around the Trust's three Strategic Goals:

To deliver safe and high quality patient care as part of an integrated system

To support an engaged, healthy and resilient workforce

To ensure financial stability

Research & Development Performance Report : April-2022

Executive Summary

Trust Strategic Goals:

- to deliver safe and high quality patient care as part of an integrated system
- to support an engaged, healthy and resilient workforce
- to ensure financial sustainability

Purpose of the Report:

To provide the Board with an integrated overview of Research Development Performance within the Trust

Executive Summary:

Key discussion points for the Board are:

Our key outcomes in the last month are as follows:

- One grant was submitted in the last month for a research funding others are in preparation
 - 59K to Obstetric Anaesthetists' Association the study is called ICaM - Intraoperative Calcium to reduce Maternal Haemorrhage:
 - We have met again with the ICS to talk about how research will fit into their governance structure and how we can facilitate the ICS research objectives going forward, we are keen to be involved.
 - We have arranged a critical friend review, a review by external R&D staff to review our services, governance and our processes, to see if there are any observations and opportunities for shared learning.
 - We have held the third cross York strategic Research Committee this month, with local and regional research collaborators
 - We have just closed the third round of fee waived PhDs along with University of St John. We have two very strong applicants going through to the full application stage
 - Upcoming events- dates for your diaries
 - Health and Society Research Showcase at York St John University
29th June 2022 09:00-17:00
- The programme is currently being drawn up, there will be showcase talks from Y&STH staff and YSJU staff followed by breakout groups with a focus on some joint key themes for both organisations for research. All interested parties should contact lisa.ballantine@york.nhs.uk
- Pint of Science is back and Luke Madge and Jillian Webster 2 of our PhD students are organisers

We are a very busy team!

Recommendation:

The Board is asked to receive the report and note any actions being taken.

Breakdown of Trial Category % - All Open Studies

Commercial	7%
Non Commercial	93%

If you would like a breakdown of Accruals per CG, please contact Angela.jackson2@york.nhs.uk

You may notice a difference between the study categories in this year's report. To more accurately match the NIHR's reporting methods we have now included a new 'Large Interventional' category which the NIHR use to capture activity with wider-scoped and less intensive Interventional studies (testing marketed products or non-invasive interventions). This will split off from the 'Interventional' total which is now there for the more intensive studies (e.g. blinded drug trials). Also, to more accurately match NIHR Portfolio reporting, the study breakdown section is only inclusive of Non-Commercial studies and excludes Commercial studies, this will additionally lower this total as most Commercial trials are Interventional.

OPERATIONAL PERFORMANCE REPORT

April-2022

Produced May-2022

The Board Assurance Framework is structured around the Trust's three Strategic Goals:

To deliver safe and high quality patient care as part of an integrated system

To support an engaged, healthy and resilient workforce

To ensure financial stability

Report produced by:
Information Team

Operational Performance Report: April-2022

Executive Summary

Trust Strategic Goals:

- to deliver safe and high quality patient care as part of an integrated system
- to support an engaged, healthy and resilient workforce
- to ensure financial sustainability

Purpose of the Report:

To provide the Board with an integrated overview of performance within the Trust.

Executive Summary:

Key discussion points for the Board are:

Nationally, the COVID-19 Pandemic NHS Emergency Preparedness, Resilience and Response incident level moved to a level 4 national response on the 12th of January 2022. A level 4 national response is defined as “An incident that requires NHS England National Command and Control to support the NHS response. NHS England to coordinate the NHS response in collaboration with local commissioners at the tactical level”.

In response to the Omicron variant the Trust has continued to operate within its Pandemic Command and Control structure and as at the 9th of May there were 111 COVID-19 positive inpatients in our acute and community hospitals having peaked at 287 on the 30th of March 2022 (reported via Trust’s external SitRep submission).

The Trust has had 5,744 COVID-19 positive inpatients since 17th March 2020, with 4,676 patients discharged, sadly 966 patients have died. Since the beginning of July 2021 there have been 2,932 new COVID-19 positive inpatients and 352 deaths.

As at the 9th of May, York Hospital has one COVID-19 positive wards with two COVID-19 positive wards/areas at Scarborough Hospital. The majority of COVID-19 positive patients are not being treated for COVID-19 as their primary complaint. However, the need to manage high risk patients separately and cohort COVID-19 positive patients due to Infection Prevention Control (IPC) requirements creates flow (bed) issues and impacts on the Trust’s ability to admit elective patients as patients cannot be admitted onto wards where there are COVID-19 positive patients.

The Trust’s COVID-19 surge plan is in place to respond to further requirements for additional beds.

Trust Planning

The workforce risk that the Trust highlighted as part of 2021-22 activity plan materialised to a greater extent than was anticipated and continued into April. This affected not just the Trust but all partners. NYCC, TEWV, YAS, Primary Care and Vocare who have all been operating at their highest level of escalation due to workforce pressures over the last six months, limiting the availability of support from the system to reduce delays to patients or support urgent care demand. Overall the Trust’s sickness absence rate is 6.2% with 604 absent as at the 9th of May, 21% of the absences relate to COVID-19.

Executive Summary (cont.):

Key discussion points for the Board are:

The pressure on medical staffing contributed to the cancellation of 247 outpatient clinics within fourteen days of the planned date and there were 163 elective patients cancelled by the Trust within forty eight hours of their intended surgery date due to non-clinical reasons. As in the previous COVID-19 'waves' cancer, urgent priority (P2) and long wait elective procedures are being prioritised.

Point of Delivery	April 2019 Outturn	April 2022 Actual	Variance	Proportion of April 2019 delivered in April 2022
First Outpatient Appts	13,619	11,628	-1,991	85%
Follow up Outpatient Appts	30,757	29,840	-917	97%
Ordinary Electives*	622	507	-115	82%
Day Cases	5,952	5,776	-176	97%

Compared to the activity outturn in April 2019 the Trust delivered the following levels of elective care activity:

*Ordinary Elective figures are based on discharge date.

April 2022 Performance Headlines:

- 70.8% of ED patients were admitted, transferred or discharged within four hours.
- The Trust reported 750 twelve hour Trolley Breaches.
- March 2022 saw challenging cancer performance with the Trust achieving one out of the eight core national standards however performance against the 14 Day Fast Track Cancer 62 Day Waits for first treatment (from urgent GP referral) and Cancer 62 Day Waits for first treatment (from urgent GP referral) improved compared to February 2022.
- 2,541 fifty-two week wait pathways have been declared for the end of April 2022.
- Seventy three 104+ week wait pathways have been declared for the end of April 2022. This number, as per national guidance, excludes those patients who have requested to defer their treatment. There were three such patients at the end of April 2022. The Trust therefore achieved the trajectory submitted as part of 2022-23 planning to have less than seventy six patients waiting at the end of April 2022.
- The Trust saw a decline against the overall Referral to Treatment backlog, with the percentage of patients waiting under eighteen weeks at month end decreasing from 59.4% in March 2022 to 58% at the end of April 2022.

Recommendation:

The Board is asked to receive the report and note the impact on the Trust KPIs and the actions being taken to address the performance challenges.

Outpatient appointments data from June 2021 now excludes CAS (Clinical Assessment Service) clinics, in line with SUS reporting. Outpatient appointments data for 1st Attendance and Follow Up attendances has been updated from April 2021 to match NHSI/E counting methodology.

All Referrals figures in the table above (3.01-3.04 for 13 months) have been refreshed in August-21 report due to a data filtering error

Hospital Cancelled Outpatient Appointments for non-clinical reasons have been refreshed from Oct-21 as dataset is now built in OBIEE

TRUST BOARD REPORT: April-2022

OPERATIONAL PERFORMANCE: ED

HIGHLIGHTS FOR BOARD TO NOTE:

71% of ED patients were admitted, transferred or discharged within four hours during April 2022. Across the Scarborough and York localities attendances at the Emergency Departments and Urgent Care and Treatment Centres were above the 2021-22 levels by 10% (April 2022; 17,873 compared to 16,159 in April 2021).

Continued staffing issues and the number of inpatients without a 'Right to Reside' in April 2022 have again exasperated the pressures that the Trust is experiencing. The ED Capital Build at York which commenced at the beginning of November 2021 has meant that York Emergency Department continues to operate out of a smaller footprint.

The scheme to build a new urgent and emergency care centre for Scarborough Hospital commenced at the end of April 2022.

In the latest nationally available data (February 2022), the NHS England position was 73.3%. Nationally the Trust placed 48th out of 126 Trusts. No Trust achieved 95% plus against the Emergency Care Standard (ECS). The 95% standard was last met nationally in July 2015.

York Locality ECS Performance was 72.2%. The hospital inpatient estate has been reconfigured throughout the latest wave to support the COVID-19 Surge Plan, with one COVID-19 positive wards in operation as at the 9th of May.

Scarborough Locality ECS Performance was 68.9%. Demand at the three independent Sector run services; Bridlington Urgent Treatment Centre, Malton Urgent Care Centre and the Urgent Treatment Centre (UTC) co-located at Scarborough Hospital, are yet to return to pre-pandemic levels. This has impacted the Scarborough locality's overall performance as the number of Type 3 attendances, whilst increasing through 2021-22 remains significantly reduced from pre-pandemic levels; -26% in April 2022 compared to April 2019. Like many system colleagues, Vocare who operate the UTC at Scarborough Hospital have had significant challenges staffing their service during April 2022, particularly at the weekends. The Trust continues to collaborate with Vocare and has, when possible, backfilled several of their staffing gaps. Weekend planning meetings are now in place between Vocare and the Trust to maximise resilience.

The Scarborough Hospital inpatient estate has been reconfigured throughout the latest wave to support the COVID-19 Surge Plan, with two COVID-19 positive wards/areas in operation as at the 9th of May on the Scarborough site.

There were 750 twelve-hour trolley waits in April 2022; 429 on the Scarborough site and 321 at York.

The Trust's Urgent and Emergency Care Project Board (UECB), as part of the 'Building Better Care' Programme, is in place, meeting monthly supported by a project manager to drive delivery. The aims and objectives of the UECB are:

Same Day Emergency Care (SDEC); the project aims to deliver Same Day Emergency Care on both acute sites to meet the requirements of the NHS Long Term Plan and Urgent and Emergency Care Network.

This includes meeting the national standards to:

- Provide SDEC services at least 12 hours a day, 7 days a week, providing an alternative to ward admission.
- Provide an acute frailty service at least 70 hours a week, with the aim to complete a clinical frailty assessment within 30 minutes of arrival in the ED/SDEC unit;
- Record all patient activity in EDs, urgent treatment centres and SDECs using same day emergency care data sets.

Urgent Care Pathways; aims to work with partners to deliver effective urgent care pathways across both acute sites to reduce ED attendances or direct admissions that do not require acute hospital care and/or can be managed with alternative care.

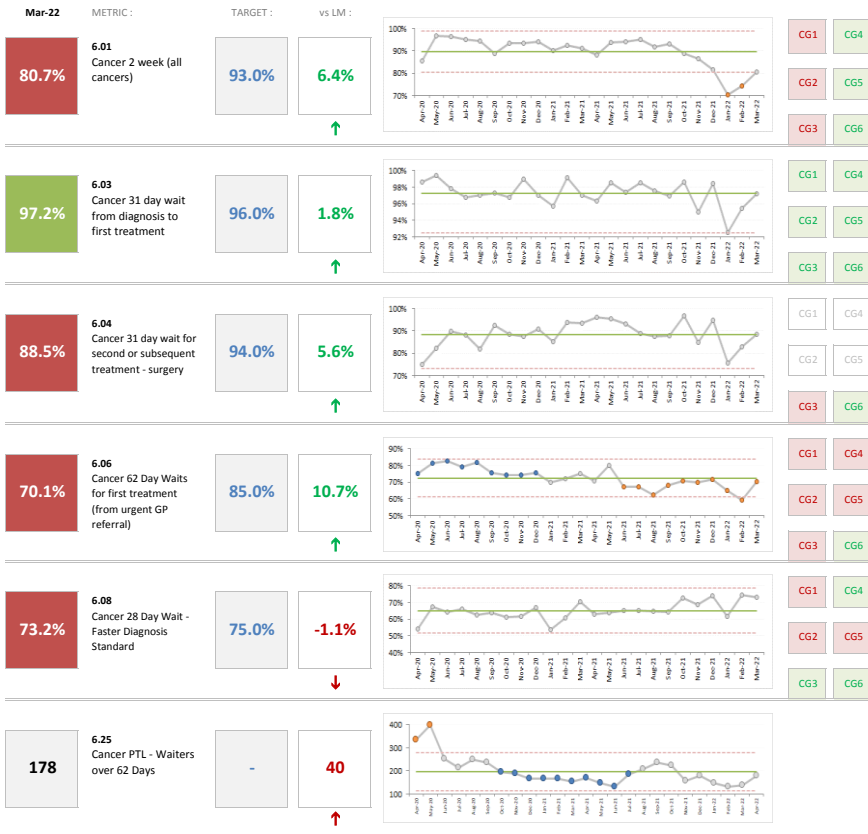

Flow and Site Management; to ensure timely admission for urgent and surgical patients to the appropriate clinical location the project aims to provide clear and effective 24/7 operational arrangements for site management issues and for the flow of patients across both acute hospital sites.

Adult Non-Elective admissions decreased in April 2022 when compared to the same period last year: down 12% (561 admissions). Paediatric Non-Electives are detailed within the Children and Young Persons section.

Super-Stranded (Length of Stay of 21+ Days) patients at the end of April 2022 decreased compared to the end of March 2022 (195 to 178 patients). Unfortunately the high level of delays is a direct consequence of capacity and workforce issues that our Local Authorities are experiencing and is likely to continue for some time.

TRUST BOARD REPORT: April-2022

OPERATIONAL PERFORMANCE: CANCER

HIGHLIGHTS FOR BOARD TO NOTE:

Trust cancer performance in March 2022 continued to be challenged, with one out of the eight cancer standards met;

- Cancer 31 day wait from diagnosis to first treatment.

The Trust's Cancer Team have reviewed and made changes to Cancer Governance and Oversight. The key areas for note are:

1. Care Groups have reinforced their weekly Care Group/tumour level PTL meeting to expedite any outstanding actions required to progress patients along their pathway to treatment as well as a focus on the 28 Day Faster Diagnosis target.
2. Care Group Directors, the Chief Operating Officer and the Planning and Performance Team receive as assurance a weekly cancer performance update that follows Cancer Wall with key information and the list of outstanding actions. This has a focus on size of PTL, 28 Day Faster Diagnosis and 62 Day standard. Remedial action will be undertaken to address any identified issues.
3. The cancer action plan is presented at Cancer Delivery Group on a monthly basis via the Project Management Office documentation. The Trust's Cancer Improvement and Performance Manager then outline where actions are off plan, as well as the barriers and mitigations to bring back on plan. In addition progress against the improvement actions will be a focus of Care Group Oversight and Assurance Meetings (with the Executive Team).

The Trust did not achieve the Cancer two week waiting times for urgent referrals target with performance of 80.7% in March (February: 74.3%). The decline in Trust performance has primarily been caused by a rise in the number of Breast referrals being seen within fourteen days. There was a 21% rise in referrals to Breast services seen across 2021-22 compared to 2019-20 (Pre-pandemic). This rise appears to be linked to recent celebrity deaths and awareness campaigns. The Breast service have tried to put on additional clinics to meet the demand but due to the pressure across diagnostic services, our radiology service has been unable to be able to support additional one stops clinics. This has resulted in a large number of patients having diagnostic scans at days nineteen to twenty one. The services have been working hard to address this and additional clinics, with radiological support, were organised in April with improved performance expected to be reflected in next month's report.

The latest available data shows the national position for two week waiting times for urgent referrals to be 75% in January 2022.

The Trust did not achieve the 28-day Faster Diagnosis (All Routes) target with performance of 73.2% in March (February: 74.3%). The latest available data shows the national position to be 63.8% in January 2022.

The Trust continues to prioritise urgent and cancer work and Care Groups have escalated the workforce situation to Quality and Executive Committees for discussion/action.

Work is ongoing with the completed NHS IST Pathway Analysers in Prostate and Lung with Lung receiving their first quarterly review in March and discussions on the key findings in progress. The UGI pathway analyser is now in development. The Trust has six Cancer Pathway Navigators in post covering the Lung, Scarborough Gynaecology, Upper GI, Lower GI, Urology and RDC services. Other Navigator recruitment is being considered through the RDC Cancer Alliance funding stream. The Somerset Cancer Register implementation is on track for the 1st of September implementation with the delivery of a test environment onto the Trust's servers in the first week of May.

Performance against the 62 day wait for first treatment target was particularly challenging at 70.1% (February: 59.4%). All patients are tracked through the operational teams, with weekly escalations to senior managers.

At the end of April 2022 there were 178 patients on the Trust's Patient Tracking List (PTL) that had waited over 62 days. On a positive note, this met the trajectory for the end of April submitted as part of the 2022-23 plans (178).

Of those waiting over 62 days, 128 are awaiting diagnosis; continuing to tackle this backlog is a top priority for the Trust and the Humber and North Yorkshire system.

There were twenty patients treated in March 2022 who had waited more than 104 days with the majority due to complex diagnostic pathways or health care provider delays. There is a continued focus on the long wait patients at the Trust's weekly PTL Cancer Wall meetings. On the 27th July 2020 there were 108 over 104 days; at the end of April 2022 there were twenty eight. To understand the impact of longer waits for patients the Trust undertakes Clinical Harm Reviews (CHR). All long waiting (105+ days) patients receive a CHR that looks at the chronology of a patient's care and ascertains whether the delay to treatment has resulted in any harm. This is a clinician-led process that reports to the Cancer Delivery Board and then into the Trust's Quality Committee.

The latest available data shows the national position to be 61.8% against the 62 day wait for first treatment target in January 2022.

TRUST BOARD REPORT: April-2022

OPERATIONAL PERFORMANCE: DIAGNOSTICS

Apr-22	METRIC :	TARGET :	vs LM :		
49.4%	3.12 Diagnostics: Patients waiting <6 weeks from referral to test	99%	-5.4%		CG1 CG4 CG2 CG5 CG3 CG6
997	3.13 Diagnostics: Total Fast Track Waiters	-	-50		
863	3.19 Diagnostics: Urgent Radiology Waiters	-	-250		
Sep-21	3.38 Total Overdue Planned Radiology Waiters	-	84		
Apr-22	3.22 Total Radiology Reporting Backlog	-	-558		
655	3.31 Total Endoscopy Surveillance Backlog (Red)	-	20		

HIGHLIGHTS FOR BOARD TO NOTE:

The diagnostics target performance for April 2022 was 49.4% of patients waiting less than 6 weeks for their diagnostic test at the end of the month (March 2022; 54.8%). The latest available data shows the national position at the end of January 2022 was 70%.

The Endoscopy performance was 59.3% (March 2022; 67.6%). The Endoscopy performance was 59.3% (March 2022; 67.6%). Additional endoscopy staff have been appointed with a start date of June 2022. A period of training will be required with an ambition to open the sixth endoscopy room at York by the end of the summer.

Radiology performance at the end of April was 48.7% (March 2022; 53.8%).

The decline in performance against the Diagnostic standard compared to pre-COVID-19 appears to be driven by the increase in cancer referrals that has required services to prioritise fast track and urgent patients. This has resulted in reduced capacity for routine patients and the decrease in performance against the 6 week target.

Currently in Radiology, the MRI radiographer workforce is under 50% capacity which means that the service is unable to run additional lists in order to meet the increased demand. The Cancer & Support Services Care Group continues to push forward with recruitment and training to address this workforce issue. The Trust is continuing to utilise Independent Sector scanner capacity to deliver activity.

The Trust continues to progress the Community Diagnostic Centre (CDC) Project and is developing the design solution for North Yorkshire & York. The proposed solution being a 'network of hubs' in York, Scarborough and Harrogate; one large spoke (Catterick) and eight 'small spokes' at various locations (including Malton, Selby, Whitby and Bridlington).

The Short Form Business Case (SFBC) deadline for CDC projects has been deferred to Q1 2022/23. The ICS has indicated YSTHFT will be expected to be CDC 'host' provider for York and Scarborough hubs, and will co-author the required SFBCs. The Trust's strategic intent is to focus on York and Scarborough hubs in Q1 2022/23, rather than the smaller spokes. The York CDC Project Board is now meeting monthly.

TRUST BOARD REPORT: April-2022

OPERATIONAL PERFORMANCE: REFERRAL TO TREATMENT (RTT)

Apr-22	METRIC :	TARGET :	vs LM :		
58.0%	5.01 RTT Percentage of incomplete pathways within 18wks	92.0%	-1.5%		CG1 CG2 CG3 CG4 CG5 CG6
40,866	5.05 RTT Total Waiting List †	29,583	1538		CG1 CG2 CG3 CG4 CG5 CG6
2,541	5.02 RTT Waits over 52 weeks for incomplete pathways	0	396		CG1 CG2 CG3 CG4 CG5 CG6
343	5.10 RTT Waits over 78 weeks for incomplete pathways	0	39		CG1 CG2 CG3 CG4 CG5 CG6
17,175	5.09 Number of RTT patients on Total Backlog (18+ weeks)	-	1220		CG1 CG2 CG3 CG4 CG5 CG6
18.9	5.08 RTT Mean Week Waiting Time - Incomplete Pathways (Shadow monitoring)	8.5	0.7		CG1 CG2 CG3 CG4 CG5 CG6

HIGHLIGHTS FOR BOARD TO NOTE :

The proportion of patients waiting more than eighteen weeks declined in April 2022, with the overall RTT position decreasing from 59.4% (March 2022) of patients waiting less than eighteen weeks from referral to treatment to 58%. The latest available data shows the national position at the end of January 2022 was 62.8%.

The Trust’s RTT Total Waiting List (TWL) increased by 1,538 from the end of March 2022 and stood at 40,866. The increase in the Trust’s overall RTT position continues to be primarily driven by the delay in time to first appointment, cancellation of outpatient clinics and elective procedures as well as a reduced level of planned elective activity caused by high numbers of COVID-19 positive inpatients and the staffing issues the Trust has experienced as a result of the Omicron Variant.

The Trust had 2,541 patients waiting 52 weeks or longer at the end of April 2022, up 396 from the end of March 2022.

NHSI/E has mandated that Trusts have zero 104 week RTT waiters by the end of June 2022. A specialty specific trajectory to achieve this was submitted to NHSI/E as part of the 2022-23 planning submission. The Trust had signalled to NHSI/E that there would be seventy six patients waiting 104 weeks at the end of April 2022.

The Trust, excluding those patients who have requested to defer their treatment, reported seventy three RTT 104 plus week waiters at the end of April 2022 thus achieving the end of April 2022 trajectory.

The Trust has mobilised its approach to sustainable recovery through the transformational ‘Building Better Care’ Programme, which is targeted at high impact actions across urgent care, outpatients, surgical pathways, cancer and diagnostics over the next two years.

TRUST BOARD REPORT: April-2022

OPERATIONAL PERFORMANCE: HEALTH INEQUALITIES (RTT)

RTT PTL by Ethnic Group

At end of April 2022

Ethnic Group	Average RTT Weeks Waiting	Number of Clocks	Proportion on RTT PTL*	Trust Catchment
White	19	28045	98.20%	94.34%
Black, Black British, Caribbean or African	18	58	0.20%	0.94%
Mixed or multiple ethnic groups	18	147	0.51%	1.26%
Asian or Asian British	20	209	0.73%	2.97%
Other ethnic group	20	100	0.35%	0.49%
Unknown	20	9925	-	-
Not Stated	18	2454	-	-
Grand Total	19	40938	-	-

Data source for trust catchment area: Public Health England NHS Acute Catchment Areas.

*Proportion on waiting list excluding not stated and unknown.

RTT PTL by Indices of Multiple Deprivation (IMD) Quintile

At end of April 2022

IMD Quintile	Average RTT Weeks Waiting	Number of Clocks	Proportion on RTT PTL*	Trust Catchment
1	17	4543	11.24%	8.88%
2	19	5587	13.83%	13.59%
3	19	8239	20.39%	20.94%
4	20	8936	22.11%	20.68%
5	20	13105	32.43%	35.90%
Unknown	20	528	-	-
Grand Total	19	40938	-	-

Data source for trust catchment area: Public Health England NHS Acute Catchment Areas.

*Proportion on waiting list excluding unknown.

HIGHLIGHTS FOR BOARD TO NOTE :

As per the 2022-23 national planning mandate, RTT Waiting List data has, in order to identify any potential health inequalities, been split to view Ethnic Groups and IMD Quintile.

The Index of Multiple Deprivation (IMD) is the official measure of relative deprivation. IMD is a combined measure of deprivation based on a total of thirty seven separate indicators that are grouped into seven domains, each of which reflects a different aspect of deprivation experienced by individuals living in an area.

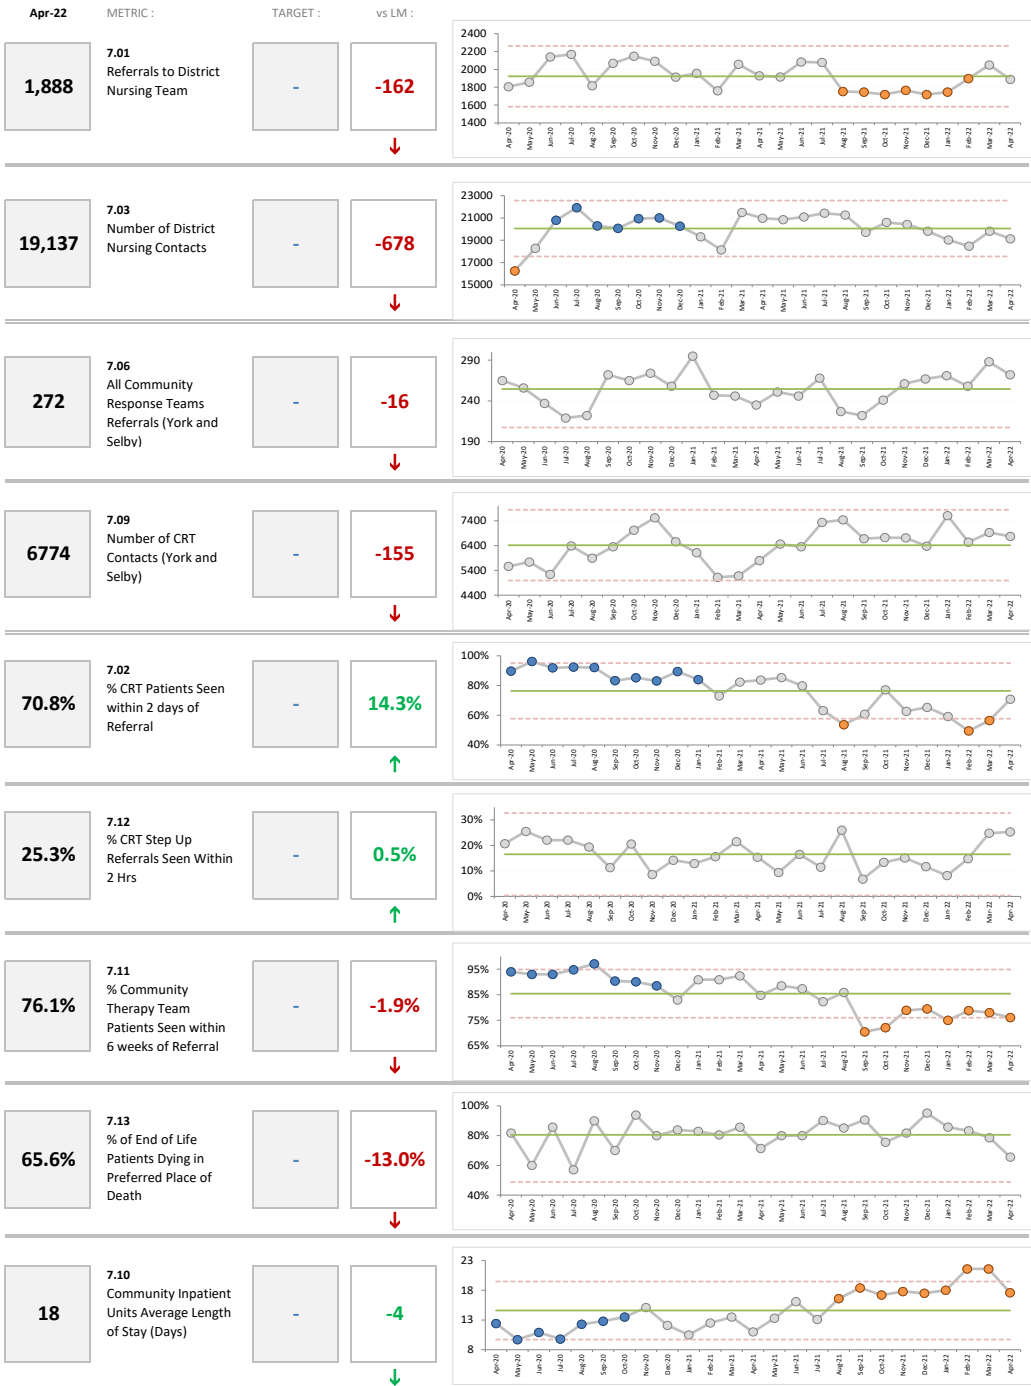

IMD quintiles range from one to five, where one is the most deprived. Please note that IMD quintiles are not available where we have no record of a patient postcode, the postcode is not an English postcode or is an unmatched postcode.

Ethnic codes have been grouped as per the 2021 census. Any patient where Ethnic Group is either 'Unknown' or 'Not Stated' is excluded from the PTL proportions. Areas to take into consideration when interpreting the data include the lack of available site split for Trust Catchment, and the variation that Clinical Prioritisation can bring to weeks waiting.

The next steps for this work will be to understand any differentials between the population base and the waiting list. Further analysis will be undertaken in coming months, and this piece of work will also be expanded to include Urgent Care, Cancer, Learning Disabilities and Military Veterans.

TRUST BOARD REPORT: April-2022

OPERATIONAL PERFORMANCE: COMMUNITY ACTIVITY

HIGHLIGHTS FOR BOARD TO NOTE :

This month sees the introduction of a number of new metrics in line with the national operational planning guidance including:

- Number of available virtual ward beds: whilst the COVID virtual ward established over winter has now closed, funding has been secured to establish a frailty virtual ward which will be in place in the autumn caring for patients with acute medical needs in the community;
- Number of referrals for Urgent Community Response and the percentage of those patients seen within the target of 2hrs (expectation is that 70% will be seen within that timeframe by December 2022): although Ageing Well funding is lower than anticipated for 2022-3, the service continues to develop within available resources including establishing partnerships with local primary care networks to deliver the initial assessment response and will be integrated with the frailty virtual ward;
- Waiting lists for adult and children's community services: an expectation that waiting lists for community services, which have grown through the COVID period, will reduce through 2022-3. This will be more challenging as the financial position means no additional funding in capacity to meet expected growth in demand although ongoing service redesign will aim to increase efficiency and therefore stabilise and reduce waiting lists where possible;

TRUST BOARD REPORT: April-2022

OPERATIONAL PERFORMANCE: CHILDREN AND YOUNG PERSONS (0-17 YEARS)

Apr-22	METRIC :	TARGET :	vs LM :			
89.1%	8.01 ECS Performance (Type 1 only)	95%	0.8%		CG1	CG4
9	8.02 ED patients waiting over 8 hours in department	-	-11		CG2	CG5
0.0%	8.03 Cancer 14 day performance	93%			CG3	CG6
51.1%	8.05 Diagnostics	99%	-0.2%		CG1	CG4
66.2%	8.06 RTT performance	92%	-1.0%		CG2	CG5
3,668	8.07 RTT TWL	2567	136		CG3	CG6
199	8.08 RTT 52 week waiters	0	31		CG1	CG4
					CG2	CG5
					CG3	CG6

HIGHLIGHTS FOR BOARD TO NOTE:

Performance against the ECS for patients aged 0-17 years was below target at 89.1% in April 2022 (March 2022: 88.3%).

The Trust is continuing to work with Nimbuscare and now the wider Humber & North Yorkshire ICS partners (Childrens and Young Person Alliance) to explore how other conditions and pathways can be supported through a model of community based assessment and ambulatory care. This will focus on the asthma bundle of care for the next few months.

The paediatric team are also engaging with primary care partners across all our places to understand their capacity and needs to support managing children in the community better, and refreshed guidelines written for primary care in managing the most common conditions in children are now available.

April 2022 has seen an increase in non-elective admissions for children, down 5% from March 2022 (-35 admissions).

There was one patient seen on day twenty of a cancer fast track pathway during March 2022, the patient was diagnosed at that appointment as not having cancer.

RTT performance against the 92% target is higher than the Trust overall performance (66.2% compared to 58%). The Trust is declaring 199 RTT fifty-two week waiters relating to children and young people at the end of April 2022. Children comprise approximately 8% of the total number of the fifty-two week waiters that the Trust is declaring for the end of April 2022 (2,541).

TRUST BOARD REPORT: April-2022

OPERATIONAL PERFORMANCE: STROKE

Month	Metric	Actual	Target	vs LM	Chart
Mar-22	9.01 Proportion of patients who experience a TIA who are assessed & treated within 24 hrs	100.0%	75%	0.0%	
	9.02 Proportion of stroke patients with new or previously diagnosed AF who are anti-coagulated on discharge or have a plan in the notes or discharge letter after anti-coagulation	100.0%	-	0.0%	
	9.03 Proportion of patients spending >90% of their time on stroke unit	70.8%	85%	-10.2%	
	9.04 Scanned within 1 hour of arrival	47.6%	43%	-10.4%	
	9.05 Scanned within 12 hours of arrival	95.2%	90%	-4.8%	

HIGHLIGHTS FOR BOARD TO NOTE:

The latest Sentinel Stroke National Audit Programme (SSNAP) report for the period October to December 2021 was published in April 2022. For this period the Trust achieved a score of 61.4 which equates to a C rating. There has been no change in our July to September 2021 performance (C rating).

Compared to the same period last year the Trust saw a 13% increase in admissions to the Acute Stroke Unit. Despite this rise the service is ensuring patients are scanned in a timely manner, are admitted to the Stroke Unit with a median time of less than 4 hours and more patients are receiving their thrombolysis in less than 60 minutes than before the introduction of the direct admission model. The domains linked to physiotherapy and speech and language therapy have however continued to be challenging. The service is working to address the issues highlighted by the SSNAP report to improve the Trust’s rating back to where it should be.

TRUST BOARD REPORT : April-2022

OPERATIONAL PERFORMANCE SUMMARY - SCARBOROUGH

REF	OPERATIONAL PERFORMANCE: UNPLANNED CARE
1.01	Locality Emergency Care Attendances
1.02	Locality Emergency Care Breaches
1.03	Locality Emergency Care Standard Performance
1.04	ED Conversion Rate: Proportion of ED attendances subsequently admitted
1.05	ED Total number of patients waiting over 8 hours in the departments
1.06	ED 12 hour trolley waits
1.07	ED: % of attendees assessed within 15 minutes of arrival
1.08	ED: % of attendees seen by doctor within 60 minutes of arrival
1.09	ED – Percentage of patients who Left Without Being Seen (LWBS)
1.10	ED - Median time between arrival and treatment (minutes)
1.11	Ambulance handovers waiting 15-29 minutes
1.13	Ambulance handovers waiting 30-59 minutes
1.14	Ambulance handovers waiting 30-59 minutes - improvement trajectory
1.15	Ambulance handovers waiting >60 minutes
1.16	Ambulance handovers waiting >60 minutes - improvement trajectory
1.17	Ambulance handovers: Percentage waiting within 15 mins (shadow monitoring)
1.18	ED - Mean time in department (mins) for non-admissions (shadow monitoring)
1.19	ED - Mean time in department (mins) for admissions (shadow monitoring)
1.21	ED - Mean time between RFT and admission (mins) for admissions (shadow monitoring)
1.22	ED - Number of non-admissions waiting 12+ hours (shadow monitoring)
1.23	ED - Number of admissions waiting 12+ hours (shadow monitoring)
1.24	ED - Critical time standards (shadow monitoring - awaiting guidance on metrics)

Outpatient appointments data from June 2021 now excludes CAS (Clinical Assessment Service) clinics, in line with SUS reporting. Outpatient appointments data for 1st Attendances and Follow Up attendances has been updated from April 2021 to match NHS/E counting methodology. All Referrals figures in the table above (3.01-3.04 for 13 months) have been refreshed in Aug-21 report due to a data filtering error. Hospital Cancelled Outpatient Appointments for non-clinical reasons have been refreshed from Oct-21 as dataset is now built in OBIEE

DIGITAL AND INFORMATION SERVICE

April-2022

Produced May-2022

The Board Assurance Framework is structured around the Trust's three Strategic Goals:

To deliver safe and high quality patient care as part of an integrated system

To support an engaged, healthy and resilient workforce

To ensure financial stability

Report produced by:
Information Team

Digital and Information Service: April-2022

Executive Summary

Trust Strategic Goals:

- to deliver safe and high quality patient care as part of an integrated system
- to support an engaged, healthy and resilient workforce
- to ensure financial sustainability

Purpose of the Report:

To provide the Board with an integrated overview of the Digital and Information Service

Executive Summary:

Key discussion points for the Board are:

People

- The Interim CDIO (Andy Williams) continues to attend key meetings, including Board of Directors and to establish key working relationships across the organisation in line with new ways of working. Senior Leadership and Management Team meetings are being held to ensure the new structure and operating model, culture and values are being embedded. EPR Strategic Outline Case is being refreshed as part of alignment with the overall ICS EPR Strategy. This will need Financial and Commercial support to understand the impact on capital and revenue streams.
- Interviews for the permanent CDIO were carried out on 28th April and due HR process is being followed prior to announcement.
- A Head of Delivery has been appointed and due HR process is being followed prior to announcement.
- The new CTO (Luke Stockdale) started on 4th May and a structured handover from Simon Hayes is in progress to ensure safe transition of responsibilities.
- The new CNIO (Nik Coventry) is exploring where this role can ensure DIS keeps patient safety, clinical priorities and User Centred Design at the heart of everything we do.
- CPD Developer recruitment continues
- Congratulations to the team for their successful deployment of GP Connect integration with CPD; this marks a large milestone in information sharing across care sectors.
- The team are still heavily focussed on delivery of the Office 365, NHSmail and Teams solutions over the next period and support from colleagues in the organisation is appreciated at this time of heavy workload.

Processes

- IT Service management - have initiated the 12 action improvement plan, which covers a number of areas across service including abandoned calls, outstanding tickets, self-service, first time fix, call answering management. During quarters 2 and 3 of 2022 this will see a marked improvements on KPI's and user experience
- The team are also designing a new major incident process and communication/reporting set for all incidents that have significant impact on service (P1 and P2).
- The team are designing new processes for the management of IT incidents and requests

Technology

- The team are about to embark upon a discovery exercise regarding IT assets, licenses and contracts (Software and maintainence)
- Infrastructure - the team are close to completing the migration to the upgraded windows 10 software.
- Throughout quarters 1 and 2 the end user team will be looking to deploy circa 2000 new devices (laptops and desktops) in to the estate to refresh 30% of the aged devices across the Trust
- The team continue to plan in the work required to make major changes to our data centres, network and server estate, with delivery starting in quarter 2
- Enabling solutions - the team are active in the delivery of the 365 solution (365 client, NHS mail and Teams) across the Trust, with significant work taking place in quarter 2
- Application Development - the team continue to deliver projects to underpin the Trust's portfolio, with a key success in the past week, with the successful roll out of GPCconnect
- The team continue to plan the integration and delivery of the major priority programmes for 22/23;

1. Laboratory Information Management System
2. Maternity IT System (MITS)
3. Cancer Information System (Somerset)
4. Patient Held Record (PKB) Phase 2

- The constraint in our ability to develop and in some cases maintain CPD further necessitates progress in move away from it. This is something we are doing incrementally through replacing the specialist elements with third party "off the shelf" systems whilst in parallel progressing with the ICS business case with the Frontline Digitisation programme to secure the funds for a bigger and more ambitious move. We are exploring what development capacity we will have left to move towards HIMSS Level 5 by December 2023 as per Secretary of State target in parallel.

Recommendation:

The Board is asked to receive the report and note the impact on the DIS KPIs and the actions being taken to address the performance challenges.

TRUST BOARD REPORT: April-2022

DIGITAL AND INFORMATION SERVICE: Infrastructure and Service Management Transformation; Information Governance; Outpatient Transformation

HIGHLIGHTS FOR BOARD TO NOTE:

CTO Update

IT Service management - have initiated the 12 action improvement plan, which covers a number of areas across service including abandoned calls, outstanding tickets, self service, first time fix, call answering management. During quarters 2 and 3 of 2022 this will see a marked improvements on KPI's and user experience

The team are also designing a new major incident process and communication/reporting set for all incidents that have significant impact on service (P1 and P2).

The team are designing new processes for the management of IT incidents and requests

The team are about to embark upon a discovery exercise regarding IT assets, licenses and contracts (Software and maintenance)

Infrastructure - the team are close to completing the migration to the upgraded windows 10 software. Throughout quarters 1 and 2 the end user team will be looking to deploy circa 2000 new devices (laptops and desktops) in to the estate to refresh 30% of the aged devices across the Trust

The team continue to plan in the work required to make major changes to our data centres, network and server estate, with delivery starting in quarter 2

Enabling solutions - the team are active in the delivery of the 365 solution (365 client, NHS mail and Teams) across the Trust, with significant work taking place in quarter 2

Application Development - the team continue to deliver projects to underpin the Trusts portfolio, with a key success in the past week, with the successful roll out of GPconnect

Operating Model - the team welcomed the new permanent CTO (Luke Stockdale) this week

Outpatient Transformation

The number of outpatients seen via either telephone or video in April equated to 21.8% of attendances (excluding radiology).

Action Notes

Executive Committee

04 May 2022

/ Attendance: Simon Morritt (SM) (Chair), Andrew Bertram (AB), Wendy Scott (WS), Heather McNair (HM), James Taylor (JT), Polly McMeekin (PM), Lucy Brown (LB), Andy Williams (AW), Amanda Vipond (AV), Jo Mannion (JM), Mike Harkness (MH), Mark Quinn (MQ), Ed Smith (ES), Stuart Parkes (SP), Michael Taylor (MT), Lisa Gray (LG) (action note taker), Kim Hinton (KH), Karen Cowley (CAS name change item only)

/ Apologies for Absence: Srinivas Chintapatla (SC), Gerry Robins (GR), Donald Richardson (DRi)

Agenda Item: Declaration of Interests

/ Notes No declarations of interest were declared.

/ Actions agreed

- Nil.

Agenda Item: Minutes of the meeting held on 20 April 2022

/ Notes The minutes were approved as an accurate record.

/ Actions agreed

- Nil.

Agenda Item: Matters Arising from the minutes and any outstanding actions

/ Notes Jenny Hey informed LG and WS outside of the meeting that the bed occupancy and reconfiguration update would need to be delayed to June 2022 as work was still ongoing with the CG's.

Actions relating to items on today's agenda can be closed down.

/ Actions agreed

- LG to update action log.

Agenda Item: Chief Executives Update

/ Notes **Operational Update**
WS highlighted operational pressures continue within the Trust. The May Day Bank Holiday had not been as challenging as Easter however yesterday had been extremely challenging and there were long waits in ED this morning. The Trust is currently the worst for ambulance waits within Humber, Coast & Vale (HCV).

Covid-19 inpatient numbers are continuing to reduce, and this is being seen across the HCV.

Similar plans to Easter Bank Holiday are being put in place for the Jubilee Bank Holiday weekend however, it is hoped the staffing position will be improved.

Board of Directors Priorities – Year Ahead

SM informed the committee that the Board of Directors (BoD) had a session on priorities for the next year when they met at the end of April. The two main things to highlight to the committee is that the BoD has agreed there is a need to publish the Trust Strategy into the wider domain given the amount of work that has gone into the strategy. SM is working with LB to do a soft launch, given the current pressures.

The BoD agreed there are four areas which they want to focus on over the coming year which are Workforce, Quality & Safety, Elective Recovery and, Flow.

SM confirmed it had been agreed to produce a narrative that supports these and develop some key measures that the BoD can look for progress against over the coming year. SM proposed a focussed session takes place at the next committee meeting in relation to narrative before it is submitted to the May BoD meeting.

The committee had a lengthy discussion in relation to the BoD's priorities, and agreed workforce was the one priority the committee should focus on at the next meeting given a lot of work is ongoing in relation to the other three priorities through the Building Better Care Programme.

The committee agreed there was a need to have two distinctive discussions around recruitment and retention. WS is to feedback to the Associate Chief Operating Officers (ACOO's) the requirement to attend the next meeting to present their CG's medium-long term plan and short term tactical plan. It was noted the conversation should focus on what the CG's/Trust needs to do and not go over the issues which are well known to both the committee and BoD.

CQC Update

SM highlighted the CQC wrote to the Trust yesterday to confirm a Section 29a warning notice will be issued following the unannounced CQC visit and the Trust submitting a response and action plan. The CQC are giving the Trust until the end of August 2022 to resolve the issues.

HM added the Section 29a was in relation to the fundamentals of care on the wards, as the CQC believe there are not effective systems in place. A report from the CQC will follow shortly and it may alter the Trust's CQC safety rating. HM noted systems are in place but due to issues with staffing levels it is difficult to deliver on them.

The Trust has ten days to factually check the accuracy and respond to

the CQC which the Chief Nurse Team are undertaking, alongside seeking legal advice.

The committee discussed the letter in detail highlighting the need to ask for amendments in terms of adding more context in on the day of the visit to allow the Trust to use this to seek assistance from the Integrated Care System (ICS) and provider partners in helping the Trust in resolving the issues the CQC have highlighted.

/ Actions agreed

BoD Priorities

- LG to add BoD priorities session to next meeting agenda and invite ACOO's.
- WS to inform ACOO's what they need to look to present.

Agenda Item:

AHP Review

/ Notes

WS noted the committee had previously commissioned for an external review of the AHP leadership structure, which Miriam Duffy (MD) has now completed. MD has provided the Trust with 17 recommendations under three key themes. From these WS has submitted four recommendations, outlined in the report for the committee to consider.

WS highlighted if the Chief AHP post recommendation is approved there is a need to look at how this will be funded as currently this is an add-on to the Deputy Chief Operating Officer role.

The committee discussed the review and felt the framework outlined, supported for AHP staff to be more embedded in CG's which is key.

The committee approved for the Chief AHP role to be created and appointed too. Once the Chief AHP is appointed they will explore taking forward the remaining external review recommendations and build a growth investment case to be submitted to the Integrated Care Board (ICB). The committee agreed the short-term fix for the funding would be to use AHP vacancies to cover the costs without removing these from the budgets entirely. The long term goal is for this to be included in the growth investment case.

/ Actions agreed

- The committee approved WS' recommendations.

Agenda Item:

Trust Lead Healthcare Scientific Officer

/ Notes

JT highlighted the committee were being asked to approve the establishment of a Lead Healthcare Scientific Officer role as per the national description. KH added it was an NHSE/I recommendation to have this role.

It is proposed the 0.2wte of band 8a funding is funded from all CG's as the postholder could be from any healthcare scientist discipline. The funding will be used to backfill time in the relevant clinical team given this role will be taken on by an existing band 8a and above healthcare

scientist.

The committee discussed and approved the recommendations.

/ Actions agreed

- The committee approved the recommendations.

Agenda Item: Learning from Deaths Policy

/ Notes

JT highlighted the committee were being asked to approve the updated policy which takes into account changes introduced nationally and locally since 2020.

Both the Learning from Death Group and Quality and Patient Safety Group have previously considered and approved the policy.

The committee discussed and approved the policy.

/ Actions agreed

- The committee approved the policy.

Agenda Item: Recruitment and Retention Consultant Workshop – Feedback

/ Notes

KH noted that given the discussion earlier in the meeting in relation to the workforce item at the next meeting, it would make more sense to join this up with the wider conversation so will not present this at today's meeting.

The committee agreed this was a sensible approach.

/ Actions agreed

- Nil.

Agenda Item: Clinical Assessment Services (CAS) name change within Directory of Services (DoS)

/ Notes

SM welcomed KC to the meeting.

KC highlighted that currently CAS running in the Electronic Referral Service (eRS) is causing confusion and disruption for patients as dummy 2am appointment letters are being sent out when a referral is added into the system. This is resulting in complaints, calls to query the 2am time, patients arriving at 2pm thinking it was a typo, and on one occasion a patient attending site at 2am in the belief the time was correct. Additionally this is leading to staff spending a significant amount of time taking calls, managing attendances and the resultant complaints when their time could be used more effectively.

eRS have confirmed they are unable to change the dummy appointment being shown in the NHS App or a letter being sent out.

KC is therefore requesting approval to change the name of the CAS dummy appointment service in the DoS and eRS, in order to make

evident to patients that these appointments are not for attendance. It will be a significant piece of work to undertake however it is estimated it will reduce disruption to patients, complaints to the organisation and regain capacity currently lost in Outpatient Services managing the consequences of the error.

The committee discussed the request and approved for this work to be undertaken.

/ Actions agreed

- The committee approved the recommendation.

Agenda Item: Care Group Verbal Reports

/ Notes

Care Group 6

MQ noted the CG was still experiencing the same issues as previously highlighted.

There is a potential interim solution to relocate the MES service from Peppermill Court which needs to be vacated. KC has visited facilities at Askham Bar which would be suitable until the service can move to its permanent home at the Community Stadium at the end of the year. The finer details are still being discussed, along with agreement in relation to rent which is looking to be a better rate than Peppermill.

Care Group 5

JM escalated the need for the works to be completed to provide the room for the obstetric ultrasound machine as this is now becoming a high risk as it is delaying scans taking place. There is only £5k of work to be undertaken however JM has been informed it has not been undertaken yet due to time and resource within the LLP. AB noted he was aware of this and was picking this up with Andrew Bennett and via the Capital Programme Executive Group.

Good recruitment for obstetricians is ongoing, with an open day taking place in Scarborough this week with one candidate being interested.

The obstetrics team had a successful time out last week.

There are some concerns with the midwifery leadership and midwifery service gaps.

Care Group 3

AV confirmed the robot was up and running in theatres as of last week, which has created a buoyant feeling within the team.

Work is ongoing with staff to organise a recruitment open day.

The CG were delighted Ward 15 had been selected as the area to pilot the Lightening the Load project with the Improvement Academy.

The Ramsay theatre will start to operate in two weeks' time. AB confirmed the contract for this was due to be signed today.

Insourcing begins next week.

AV noted despite the positives happening in the CG there were still the same issues previously highlighted in relation to workforce, flow and delays.

Care Group 4

KH noted diagnostic performance, particularly imaging, continues to deteriorate and the Trust is now in the bottom 6 in the country in relation to this standard. A robust conversation was had at the CG's oversight and assurance meeting last week and a paper is being prepared to allow for a discussion to take place at ICS level.

The capacity of the LLP is an issue as capital work being delayed is creating real problems in several areas but especially within nuclear medicine on both sites which is a vulnerable service.

The medical oncology workforce is struggling to provide on call due to sickness and one going off on maternity leave this week. SC is therefore looking into how this might be covered over the coming weeks.

Care Group 2

ES did not have a specific update for CG2 in the absence of GR however ES highlighted pressures continue on acute services, and there it is a battle to keep ambulances on the roads.

SM added the Scarborough new build launch took place last week for both staff and key stakeholders, and the day was a great success. During the day the charity appeal was also launched.

Care Group 1

MH noted an update had been circulated to the committee on the York ED build, adding the build is progressing and remains on track to complete in March 2023. Following feedback, signage improvements have been made which has made it easier for patients/visitors.

There are approximately 20 covid-19 patients that Owen Bebb is trying to manage and ongoing discussions are taking place in how that cohort of patients are managed going forwards.

There is a lot of sickness within the medical teams.

The CG are currently looking to find a Clinical Director replacement in ED and lead roles within cardiology and respiratory, which feeds into the integration piece between CG's 1 & 2 in particular.

/ Actions agreed

- Nil.

Agenda Item: Business Cases

/ Notes

2021/22-85 Obstetric Ultrasound Machine

JM noted this case was for the additional obstetric ultrasound machine. This was approved without a case in November 2021 due to time pressures and to allow for procurement to take place, therefore JM is seeking retrospective approval through the formal governance route.

The committee discussed and approved the case. Noting AB was escalating the issue discussed during the CG updates in relation to the capital works needing to take place to allow use of the machine. HM highlighted that this was picked up on during a patient safety walkround recently so it will get escalated to BoD.

/ Actions agreed

- The committee approved BC 2021/22-85 Obstetric Ultrasound Machine.

Agenda Item: Reflections on the meeting

/ Notes

The committee agreed it was helpful to meet in person again and requested that all meetings going forwards were in person. Noting a larger room than the Boardroom would be required for the next meeting given additional colleagues were being invited.

/ Actions agreed

- LG to source a room for the increased number of attendees for 18 May 2022 and update the second meeting of the month to take place in person.

Agenda Item: Any other business

/ Notes

Capital Prioritisation

AB thanked the CG's for their work on the capital prioritisation lists and reminded them their submissions need to be with him by next week.

DIS Updates

AW highlighted there was still pressure for all staff to accept the nhs.net Acceptable User Policy (AuP) and apologised for any confusion in relation to the Office 365 and nhs.net communications over the last few weeks. AW is going to work with LB to clarify the communications going out to ensure these are clear for staff.

GP Connect has now gone live.

A new Chief Technology Officer, Luke Stockdale has been recruited and started with the Trust yesterday. A Head of Delivery is being recruited to as well and a new Chief Digital and Information Officer has been recruited too. SM confirmed he would share further news on this once the recruitment checks have been completed.

/ Actions agreed

- CG's to ensure their capital prioritisation lists are returned to AB by next week.

Date of next meeting:

The next meeting will be held on Wednesday 18 May 2022 via Webex

ACTION LOG – Outstanding

Meeting Date	Action	Due	Owner
07.07.2021	Agree a solution offline for the Lead Clinician for Paediatric Emergency Medicine and seek approval from SM and AB, unless the solution is catastrophic as which point it would need to return to the committee for approval.		CGD 1, 2 & 5
21.07.2021	JT confirmed he had a conversation with Gary Kitching and an ED consultant is interested in a 4PA role. DT noted he was calling the consultant this week to explore this further.		
01.12.2021	An update is to be received in January 2022.		
02.02.2022	JT highlighted the PEM consultant action was not resolved and he is in discussions with MH and is meeting with MH later in the day to look to try move this forwards.	January 2022	
16.02.2022	HM noted in the CQC update there was no further progress with this.		
05.01.2022	DIS Funding Bids A regular update to keep sight of the risk around the Essential Services Programme and procurement following the holistic partner challenge.	Ongoing	Andy Williams
02.02.2022	JT, WS and HM to get together and create a steering group to progress the pathway zero improvement work.	March 2022	James Taylor, Wendy Scott & Heather McNair
02.02.2022	6 and 12 month review of the change to the management of the Trust's Cancer Nurse Specialist Teams.	August 2022 & February 2023	Srinivas Chintapatla
20.04.2022	KH asked for the review dates to be two months later given the dates were from the approval date, and not when the change was implemented.	October 2022 & April 2023	
16.02.2022	An update on the harmonisation of local pay is to be submitted to the committee in April 2022.	April 2022	Polly McMeekin
11.04.2022	PM confirmed Lydia Larcum needed to meet with the CG's following sharing an updated paper with them so this item will now come to a meeting in May.	May 2022 – 2 nd meeting	

16.02.2022	2021/22-59 Community Stadium and Community Estate Utilisation Plan – Update <ul style="list-style-type: none"> Quarterly updates to be submitted from the Community Estate Working Group. Expansion into any vacated space will require a business case as no funding is available to service or recommission these areas. 	Various June 2022 Ongoing	Various Neil Wilson CGD & ACOO's
02.03.2022	JH to submit an update on the bed occupancy and ward reconfiguration work by the end of May 2022.	May 2022	Wendy Scott
04.05.2022	JH confirmed this work was ongoing with the CG's and would be ready for submission in June, WS is aware.	June 2022	
02.03.2022	To receive a review on the updated ICU discharges SOP in two months.	May 2022 – 2 nd meeting	Amanda Vipond
02.03.2022	2021/22-89 Ensuring Sustainable Pancreatic, Biliary and Liver services (Medical and Surgical) Trust wide <ul style="list-style-type: none"> To be re-submitted once the conversations with Hull, Leeds and the ICS have taken place within the next month to allow for final sign off before TB starts his training. 	April 2022	Mike Harkness
20.04.2022	GR confirmed conversations are still ongoing in relation to this case.	May 2022	
20.04.2022	Quality Reporting Proposal <ul style="list-style-type: none"> HM to clarify with Shaun McKenna whether the quality reporting proposal was an additional report or replacement and feed this back to the committee. The committee confirmed the proposal was approved if this replaced the other quality reports however if it is in addition too then the committee does not approve it given it will create further work. 	May 2022	Heather McNair
04.05.2022	BoD Priorities <ul style="list-style-type: none"> LG to add BoD priorities session to next meeting agenda and invite ACOO's. WS to inform ACOO's what they need to look to present. 	May 2022	Lisa Gray & Wendy Scott
04.05.2022	LG to source a room for the increased number of attendees for 18 May 2022 and update the second meeting of the month to take place in person.	May 2022	Lisa Gray
04.05.2022	CG's to ensure their capital prioritisation lists are returned to AB by next week.	May 2022	All

June 2022

Laura Wilson, Sister and Gemma Salt, Healthcare Assistant	Scarborough	Nominated by Joanne Howe, relative
<p>I attended the Emergency Department after being told by my GP to take my daughter to minor injuries as she had a splinter in a delicate area. At first we got told to go down to minor injuries, however the nurse we saw said we needed transferring down to paediatrics ED due to the nature of the splinter. Laura and Gemma were very calming for my daughter and played with her. Laura had the task of doing a Covid swab on my 8 year old, a challenge as she does not like having swabs. Both kept us informed of what was occurring whilst waiting for the regular doctor to arrive. Gemma kept my daughter replenished with drinks and food, whilst also coping with the busy pressures of the Emergency Department. Two amazing ladies, who deserve to be recognised for their commitment to the NHS.</p>		
Michael Scott, volunteer	York	Nominated by Sue Nightingale, colleague
<p>Michael volunteers with us in the discharge lounge, he is always very helpful and polite both with patients and staff members. Michael is always cheerful and interested in everything that is happening in the Trust. It is a pleasure to have Michael volunteering with us.</p>		
Helen Pape, Skin Cancer Specialist Nurse	York	Nominated by a colleague
<p>Helen has stepped up to the mark over the last few weeks. As with many teams, the skin cancer nurses have been affected by sickness within their team and among other allied clinicians who usually support them. Helen has maintained the CNS service throughout this period and made sure that all of our skin cancer patients continue to receive the care they require during this difficult time. Thank you Helen.</p>		

Vicky Wharram, Skin Cancer Care Co-ordinator	York	Nominated by a colleague
<p>Vicky is a key member of the skin cancer service who is often overlooked. She acts as the first port of contact for current patients ringing up regarding questions about their skin cancer diagnosis/care, and generally organizes members of the skin cancer team to make sure any loose ends around clinical care are tidied up. Recently her job has been much harder due to sickness in her team and other clinicians who work closely with her. However, she has continued to keep the boat steady throughout. Thanks Vicky.</p>		
Outpatients Department	Scarborough	Nominated by a colleague
<p>I have recently been a TNA student in the Outpatients department at Scarborough and the team have all been really lovely to me and have made me feel very welcome. Everyone including the doctors, nurses, HCA's and housekeeper took the time to show me around and were happy to answer all my questions despite being busy. I have thoroughly enjoyed this placement, thank you once again to all the staff on OPD at Scarborough.</p>		
Stacey Watkins, Catering Operative	York	Nominated by Jo Dea, colleague
<p>During the Easter Bank Holiday, I had the pleasure of supporting and work shadowing Stacey. I was impressed by her professionalism and her knowledge was outstanding. She was very patient with me, wasn't fazed by any of my questioning and equally wasn't shy in making an observation regarding patient safety. The appreciation of individual patients' requirements, a point that really touched me, was her care about an end of life patient and her needs. She will make a great buddy to new starters as she had some 'knowledge of the trade' examples that simplifies and aids service. Her professionalism, communication and familiarity with clinical staff shone through service.</p>		

COVID Medicines Decisions Unit	York	Nominated by Mark Quinn, colleague
<p>The CMDU (Covid Medicines Decisions Unit) was set up in January 2022 within 2 weeks of the NHSE request just prior to Christmas. The service provides prophylactic Covid treatment for the most vulnerable patients if diagnosed with Covid.</p> <p>With no additional staff or resource, a true multidisciplinary/cross care group (4 and 6) effort got this service off the ground. The OPAT team have done first line triage of vulnerable patients 7 days a week; the rheumatology team have prescribed the medications and pharmacy have delivered second drug safety triage due to complexity of treatments involved and delivery to patients.</p> <p>Every member of each team has gone above and beyond their day jobs to deliver this service. The commitment and hard work from everyone was exemplified over the long Easter bank holiday. The team are driven to keep our most vulnerable patients safe, prevent hospital admissions and ultimately save lives.</p>		
Louise Young, PALS Advisor	York	Nominated by Kathleen Merrick, colleague
<p>Lou offered to go out of her way to give practical support to a distressed and concerned patient who contacted her team and had been advised to attend for assessment. Her kindness and caring approach is appreciated.</p>		
Nicola Tuck, Physiotherapy Assistant	Selby	Nominated by Eddie Stock, colleague
<p>Nic always strives to go above and beyond to deliver excellent patient centred care. This has been evident during her whole time here in her normal role and during her redeployed role. Today she really looked after a pregnant patient who was struggling to mobilise, she helped her on entering the department and saw her safely out after the appointment ended (which went well into her lunch break). This is not the 1st time this has happened, nor will it be the last.</p>		

Jane Kemp, Staff Nurse	York	Nominated by Lotte McCabe, colleague
<p>Janey is a consistently hardworking and committed nurse. Her dedication to the ward, her patients and her colleagues is always shining. Janey recently suffered a personal loss, and in spite of this, managed to return to work and deal with all the challenges a day on the ward brings with it, in the same professional and dedicated manner she always shows - even holding the hand of a patient who was in their final moments. She is a particularly strong individual. On a lunch break recently, Janey used her own time to take a long stay patient out for a walk in the sun and to get a coffee. Janey is all about the little things that make a big difference.</p>		
Gemma Campayo-Losa, Ward Sister	Scarborough	Nominated by Josselyn Chukwuma, colleague
<p>Gemma is very knowledgeable in her job role and practices effortlessly and with passion to delivering quality patient care. Gemma works excellently with all members of staff (including doctors), supporting and guiding everyone who needs help or is struggling with decision making. She is always available when needed to carry out her duty as well as assisting every member of staff to deliver quality patient care. She is an outstanding fellow colleague and she inspires me and everyone she works with. I truly lack words to describe her excellence, but to summarize it all, she is a Star.</p>		

Dr Marcus Nicholls, Consultant Radiologist and Vascular Imaging Unit	Scarborough	Nominated by Lisa Shelbourn, colleague
<p>Dr Marcus Nicholls had a full interventional radiology list scheduled at Scarborough for Wednesday 13 April. It became apparent early that week that the number of acutely unwell patients who were on wards in Scarborough who also needed a procedure performing by Dr Nicholls was growing. On reviewing the number of patients he had to see on his list he realised that there were more patients than could be seen on his list. This would mean either patients on Wards on the Scarborough site waiting longer in a bed until the next list could be arranged after the Easter holiday, or some suspected cancer patients who were awaiting a biopsy would need to be cancelled and rearranged for the following week.</p> <p>Marcus discussed this with the nursing team, who were due to support his list that day, and they all agreed to work over breaks and run the list over if necessary in order to ensure all of the patients who were waiting had their procedure that day.</p> <p>The team did an amazing job and didn't stop until all of the patients were seen, showing a fantastic dedication to patient care, and meaning the patients on ward areas had their pain relieved and could be discharged from hospital sooner. The radiographers also worked extremely hard rearranging patients to ensure they had beds. Loran also stayed until 20:00 catching up with the CT list after others had finished with all the intervention patients.</p>		
Samantha Williams, Registered Nurse Associate	Community	Nominated by John Birch, patient
<p>Sam goes above and beyond, she has helped immensely with my legs and nothing is ever too much trouble. She is so caring, does a brilliant job, she has really taken time with me. I really appreciate everything she does for me and think she is marvellous.</p>		

<p>Helen Lamb, Ward Sister, Gemma Grainger, Ward Sister</p>	<p>York</p>	<p>Nominated by Emma Taylor, colleague</p>
<p>Helen and Gemma have both gone above and beyond their roles to support me during a particularly challenging time in my personal life. Without their support over the past 6 months I feel that I would have been in a much worse place and unable to manage under the current stress I have. They have made me feel that while my world is falling apart the only thing I do not have to worry about is my work situation.</p>		
<p>Georgia Miles, Directorate PA and Lucy Brice, Ward Clerk</p>	<p>Scarborough</p>	<p>Nominated by a colleague</p>
<p>Georgia Potter and Lucy Brice on reception at Women's Unit Scarborough Hospital epitomise the trust values through and through. Nothing is too much trouble; they are always welcoming and friendly to patients and colleagues alike. If there is a problem, they will seek a solution without reluctance, even in a time pressured environment. They bring in special little treats for colleagues to keep up morale, as well as going out of their way to help other colleagues if they know they are busy. They definitely deserve to be recognised to know that we fully appreciate their smiles, kindness and support. Thank you ladies.</p>		
<p>Accident and Emergency, Paediatrics</p>	<p>York</p>	<p>Nominated by Yasmina Robinson, relative</p>
<p>My daughter Gia was brought in by ambulance last night and everyone who helped to look after us were just amazing, so helpful and kind. I have anxiety and have had previous bad experiences, but everyone who cared for us was brilliant, especially the doctor and the nurses who were just great. Thank you so much.</p>		

Gemma Wilson, Retinal Screener	York	Nominated by Adam Shaw, colleague and Richard Salt, colleague
---	-------------	--

First Nomination

Gemma showed great care and empathy with a patient who attended for eye screening and suddenly became ill. Unfortunately, after the first part of her screening episode was completed the patient, who lives in a care home, became unwell and was in the waiting area. Gemma comforted and looked after the patient, getting her some water and reassuring her, and then proceeded to tidy up whilst arranging for a thorough deep clean of the area.

The patient was very distressed and upset about what had happened, but Gemma's manner and caring nature helped the patient to relax and feel better. Once the initial clean-up was completed, Gemma spoke with the carer and patient, arranging for the patient to be taken home and reassuring her that a replacement appointment would be arranged as soon as possible.

Second Nomination

A patient came to screening to enquire why her husband hadn't been screened for 5 years. Gemma said she would find out for this lady, took the patients' husband's details and passed it onto myself to find out. The patient had been referred to Ophthalmology but hadn't attended so was discharged and may have been lost to follow up. If it wasn't for Gemma's intuition this patient may have not been seen for quite some time. The patient is booked to have their eyes screened with us in a few weeks' time.

Kerry Gover, Staff Nurse	York	Nominated by Beverley Marshall, patient
-------------------------------------	-------------	--

On my second visit to this team for breast cancer treatment they were all amazing and looked after my every need. Kerry was so kind and caring, treating me with such dignity. She spent time with me, helping me, making sure I wanted for nothing and talking to me, which I needed, and making sure I wasn't in pain. Nothing was too much trouble. She is a beautiful person inside and out. Perfect in her role. Thank you Miss Piper, surgeon, Kerry and everyone on the ward. My care was first class.

Suzie Marsden-Hendrick, Administrative Assistant	Scarborough	Nominated by Kelly Townend, colleague
<p>I'm nominating Suzie, as she recently had to step up and take on work that she wasn't overly familiar with, in order to keep service running within her department. The department had just gone through a restructure, her role was changing and she found herself running the service alone, on a part time basis. She went above and beyond what was expected of her, in order to ensure service users got the training required. Suzie you are amazing and deserve this award so much, well done.</p>		
Tim Hamilton, Physiotherapist	York	Nominated by Lucy Holmes, colleague
<p>Tim is an excellent physio, loved by patients and staff. Our patients on ICU are often very complex and the time and effort that Tim puts into their physio reviews is commendable. He is often around long after his finishing time because he stays to make sure that patients are all settled and returned to bed before he goes. He is a real team player, and one of the most patient people I've ever met. Sadly Tim is leaving us on ICU very soon, but I know he will be a huge asset to his new team, they are very lucky to have him.</p>		
Ward 17, Paediatrics	York	Nominated by Alexandra Damazar, colleague
<p>Overnight a teenage patient with mental health problems barricaded herself into a side room on the ward. It was impossible to open the door more than 5cm maximum, the patient refused to move the barricade and was making threats to her life. Staff made significant attempts to de-escalate the situation, but due to risk of harm to patient, staff security were called and broke down the door. The patient was safe, and staff all removed from risk of physical harm despite very high risk circumstances to all. All staff went above and beyond to achieve this, at personal risk. Specific staff on duty were Emma Sebag-Montefiore, Nicola Howden, Sandra Lund, Lauren Burgess, Cath Southon.</p>		

Alex Bill, Cleaning Operative	Community	Nominated by a colleague
<p>In February of this year, Tadcaster Health Centre was flooded affecting all the clinic rooms and offices in the downstairs area. Our colleague Alex who is part of the domestic services worked tremendously hard to clean up the building, clear out equipment and resources which can no longer be used. He has also supported services in the rooms so they can clear out resources and move cupboards to clean underneath. It has been an enormous job and he has done it with such a positive and helpful approach. We have some way to go before the health centre is up and running, but without Alex we would not be where we are now and to be able to use the upstairs part of the building. All his support and help are so greatly appreciated by everyone working at Tadcaster Health Centre and we want to say a big thank you.</p>		

Joanne Southwell, Strategic Capital Projects Manager and Sarah Barrow, Head of Business Development	York	Nominated by Andrew Bennett
<p>Jo and Sarah have worked with passion and determination to deliver the Full Business Case for the Scarborough Urgent and Emergency Care Project, which has recently received approval by NHS England & Improvement ('NHSEI') and the Department of Health and Social Care ('DHSC'). This approval has unlocked £40m of central government funding for the project, which will be supplemented by £7m of other funding to enable the project to go ahead and deliver new state-of-the-art urgent, emergency and critical care facilities at Scarborough General Hospital as well as significant electrical engineering infrastructure improvements.</p> <p>The project is currently commencing on site and will be completed early in 2024. Due to the value of the scheme, the Trust had to adhere to the HM Treasury and NHSEI Business Case guidelines that require three business cases – the Strategic Outline Case ('SOC'), Outline Business Case ('OBC') and Full Business Case ('FBC') – to be submitted sequentially and with Trust Board, NHSEI and the DHSC approvals at each stage. This process commenced in 2019 with the SOC, the OBC followed in 2020 and the FBC was completed at the end of 2021.</p> <p>Jo and Sarah have worked tirelessly and diligently to marshal a huge amount of very detailed information into all three business cases – they have literally invested blood, sweat and tears. NHSEI confirmed that the FBC received great feedback from the approving committee – thoroughly deserved of course, but such positive feedback is apparently almost unheard of from this committee. Consequently, we have been asked if the business case can be provided to other trusts looking for a “good example” and also if it can be used for training purposes in the national Better Business Case training as an exemplar. Well done to Jo and Sarah on getting the business case completed and approved.</p>		

<p>Agnieska Rystwej, Healthcare Assistant</p>	<p>York</p>	<p>Nominated by Ellie O'Neill - on behalf of the Breast Care Nursing Team, colleague</p>
<p>There was an incident within the reception area of the Magnolia Centre. Agnes noticed that the patient was experiencing difficulties and needed help. She offered help immediately. Ultimately, the crash team were needed and Agnes instigated this call. She remained with the patient until the appropriate help arrived. After the incident, Agnes highlighted the importance of asking people if they need help rather than just presume that they are ok, or that someone else will help. Agnes was a prime example of everything the Breast Unit aspires to be..... caring for our patients.</p>		
<p>Lizzie Verity, Midwife</p>	<p>York</p>	<p>Nominated by Laura Marsden, patient and Bradley Marsden, relative</p>
<p>First Nomination I was induced Thursday 21 April and when moved into the labour ward I was met with Lizzie who was absolutely amazing from the start to finish. I ended up needing an emergency caesarean due to foetal distress and he came out weighing 10.10lb born on 23/04/22. Lizzie explained everything in such great detail and made sure I was as ok as I could be throughout the whole experience and process, she honestly couldn't have done a better job. Myself, Bradley and baby Freddie cannot thank her enough.</p> <p>Second Nomination Lizzie was incredible from the minute she picked us up from the antenatal ward, making both my wife and I feel at ease and in great hands from minute one. In what became a stressful labour, resulting in an emergency c-section, Lizzie was calming and compassionate and provided great care to us all. As a first time dad, it was great to have someone with her personality and experience taking care of my wife.</p>		

Marie Stephenson, Deputy Sister	Scarborough	Nominated by Abby Fennell, colleague
<p>On the 26 April a patient was booked to attend the endoscopy department at Bridlington, unfortunately when transport arrived to collect the patient they were not in a condition suitable for collection. The patient had been trying to contact her carers to assist and transport were unable to help. Marie contacted the patient to discuss rebooking the appointment and recommended Inpatient prep.</p> <p>After speaking to the patient Marie was concerned that she would be left until carers attended at 6pm to be cleaned and felt that personally she wasn't comfortable with the situation. Therefore Marie and one of her students contacted the patient and advised her that they would go round to help her. The patient was very grateful for this offer so they both went in their break to help. When they arrived she was upset with the situation. They helped to get her cleaned up and changed her clothes and made her more comfortable, and also ensured that everywhere in the house was cleaned. She thanked both for their kindness as felt they had been the only ones who had cared. Myself and my colleagues in Endoscopy were really moved by Marie and her colleague's kindness towards this patient and felt it was a true example of care within the Trust.</p>		
Mark Davies, Senior Physiotherapist	Selby	Nominated by Joanne Chatham, colleague
<p>Mark is a highly motivated individual who goes above and beyond his duty of care with the patients on our Inpatient ward. Whenever I am passing I see him working with the patients in such a positive and encouraging manner. He displays much empathy, compassion and patience within his daily role and puts a smile on many of his patient's faces. When one of Mark's colleagues mentioned they didn't expect to see him on the Bank Holiday Monday he told them he thought 3 days would be too much of a break for some of the patients under his care certifying his utter dedication to his work. He is always pleasant, upbeat and professional and deserves some recognition.</p>		

Dr. Damian Mawer, Consultant	York	Nominated by Dr. Neil Todd, colleague
<p>Damian has worked tirelessly throughout the COVID pandemic to ensure that as a healthcare organisation we have done everything possible to protect our patients, staff and visitors from the worst ravages of this awful infection. He has worked up myriad policies in consultation with a very wide range of staff across the Trust, often at very short notice. He has achieved consensus in many tricky areas and advised Silver and Gold commands on how best to tackle this infection. His working hours have been extremely long to deliver all of this. I believe that this level of commitment to human wellbeing is very rare and should be widely recognised.</p>		
Glenn Hawthorne, Cardiac Outreach Nurse	York	Nominated by Reece Dodsworth, colleague
<p>I was working in the waiting room in the Emergency Department whilst the department was under extreme stress. I had a patient whom I was concerned about with a raised trop and irregular ECG. The patient was anxious, crying and scared. I phoned and asked Glenn whether he could offer support to the department and to see the patient. Glenn promptly came down to ED and reviewed and offered support. Whilst this lady was scared and anxious, Glenn's kindness, openness and honesty reassured her. Glenn was able to get a CCU bed for the patient and ensured she received the care she needed.</p>		
Ellis Birks, Midwife and Katie Collins, Midwife	York	Nominated by Blossom Hill, patient
<p>The team who looked after me when my labour went wrong. The quick action saved my son's and my own life. Everyone who cared for us was truly kind, lovely and amazing. I wish I could thank everyone who was involved in our care.</p>		

<p>Karen Alton, Cleaning Operative, and Geoff Harrison, Cleaning Operative</p>	<p>York</p>	<p>Nominated by Andrew Porter, patient</p>
<p>They have a great work ethic and just get on with the job. The place is always clean, they are such hard workers, never stop and very pleasant. They will help if they can without hesitation and are a credit to the NHS.</p>		
<p>Nelson's Court Therapy Team</p>	<p>York</p>	<p>Nominated by Eileen Watson, colleague</p>
<p>This star award nomination goes to the whole therapy team that supported a dual physiotherapy clinical placement for two students with a new model of working 2:1. The demands for physiotherapy student placements are great at the moment and the team stepped out of their comfort zone to support the students in this way. The feedback was also fantastic; 'Overall I wouldn't change anything about this placement, I want to say thank you to the therapy team for making this a fulfilling and enjoyable place to be - my confidence has grown so much. I have appreciated the opportunity to carry out a self-directed research project, developing my understanding of in-patient practice and widening my knowledge.'</p>		
<p>Haematology and Transfusion Staff HRI</p>	<p>York</p>	<p>Nominated by Mandy Bryan, colleague</p>
<p>The team have worked tirelessly over the two years of the Covid Pandemic and even more so recently. An inspection by the United Kingdom Accreditation Service for laboratories, highlighted the commitment and enthusiasm of staff in the department and found it remarkable that despite high staff sickness levels and constant shifts requiring last minute cover, the team not only maintained accreditation but also improved on this. The visit this week lasted 3.5 days and there were 7/30 staff sick during this time, several on leave and several on night shifts or recovery. This team has been absolutely remarkable and resilient.</p>		

Tina Burnes, Healthcare Assistant	Bridlington	Nominated by Kerry Headlam, colleague
<p>Since the new unit opened on Thornton Ward known as Bridlington Care Unit, Tina has been doing bank shifts on here with the team. Tina is a kind, caring and supportive individual. I have worked with Tina frequently on BCU and have been amazed at how much dedication she has for the patients we look after. Tina has been going that extra mile to help comfort patients and highlight concerns before we send them home or for a placement. In particular we recently had a lady who had cancer and she became unwell, if it wasn't for Tina's concern and knowing her patients, we did a lateral flow and this lady was covid positive. The family were extremely grateful for all Tina had done and for looking after their mother. This lady was then made palliative and able to go home back with her family where she wished to see her last days. The empathy Tina shows is remarkable and I feel she should have some recognition her work. Showing all the trust values and also being a good person.</p>		
York Community Response Team	Community	Nominated by Emma Seabourne, colleague
<p>A patient was referred to York Community Response Team following multiple falls at home and concerns raised about her safety. Assessed by Charlotte Glover (Band 6 Nurse) at the patient's home it was felt that the patient required a step-up bed to support this ladies safe mobility whilst recovering from the falls, rather than un-necessary admission into hospital. Patient confidence was badly affected following the fall. Step up bed identified and accepted, Charlotte attempted to organise transport to take this lady to the step-up bed. Yorkshire Ambulance were unable to accept this request as only responding to emergency calls at this time – RATS nor GP were unable to support transport solutions, also family unable to support. YCRT attempted to access a wheelchair taxi (none available in the city that night and not taking advanced bookings) Also patient did not have a wheelchair to facilitate admission into step-up bed. Eventually YCRT able to book a wheelchair mini-bus for the following day. Jack Appleby visited that evening to ensure that patient was safe overnight and gave re-assurance as needed. Following a wheelchair being sourced from an In-patient Unit – Jack Appleby and Sam Bradley visited the patient the following morning to support morning routine, facilitated access out of the property and into the mini-bus; escorting the patient to the step-up unit. I have nominated these team members as they have showed commitment to patient safety, supporting patient wishes and thinking outside the box in preventing an un-necessary admission into hospital.</p>		

Sophie McDowall, Healthcare Assistant	Community	Nominated by Aivin Michael, colleague
She was active in her job. She behaves well with others. She has good time management.		
Emergency Department	Scarborough	Nominated by Sam McIntyre, colleague
The team on ED, both nursing and medical, are working under extreme pressure to try and help maintain safe care to patients in the department. Care and hourly jobs in the waiting room, corridor, on ambulances, as well as trying to provide ward based care to people in ED for sometimes days, whilst waiting for beds. The team have had to adapt to the challenge, work under extreme pressure and work as such a cohesive unit, I believe it deserves recognition. The NICs and EPICs have been second to none.		
Adrian Soboczynski, Advanced Clinical Practitioner	Selby	Nominated by Claire Ramsay, colleague
Adrian truly represents the Trust Values every day, Adrian shows genuine care for staff and always demonstrates a professional, helpful and positive attitude even in challenging times. The ward has recently been through a challenging time with staffing due to an outbreak of Covid 19, on days where staffing has been depleted Adrian has responded to the needs of the ward, patients and staff by working in partnership with all members of the MDT and helping beyond his ACP role. Adrian has undertaken medication rounds and assisted patients with personal cares to ensure that both the needs and safety of the patients have been met and to ease the work load on other staff members. Adrian is a valued and respected team member who creates a positive and happy vibe on the ward, he also makes a great cup of tea :-)		
Mark Powell, Operating Department Orderly	York	Nominated by Peter Redfern, colleague
Mark is always cheerful. Very willing to help others. Really patient in explaining things to new team members so they are aware of what needs doing. He is a team player.		

Penny Furness, Healthcare Assistant	Scarborough	Nominated by Adelle Whittaker, relative
<p>My son Billy Whittaker came to the Emergency Department where he was assessed for leg pain. We were moved into some cubicles close to where the ambulance brings patients in. While we were waiting for X-rays a lady called Penny was in the computer room and made my little boy happy. He was hungry and she went out of her way to create a little picnic on a tray for him and brought a toy dinosaur so he felt special. Not only that, she wanted to find him a teddy, she couldn't find any, but then remembered some made ones she had from family somewhere. She brought them in and let Billy choose one from the bag someone in her family had made. She even let him keep it to make him feel safer in hospital and not worried.</p> <p>Everything she did made Billy feel happy and she really went above and beyond hospital care to ensure he wasn't worried. Thankyou Penny.</p>		
Steve Smith, Porter	York	Nominated by Emily Poppleton, colleague
<p>Steve assisted myself to take a confused, aggressive patient to CT after the patient had a fall on the ward. Steve was amazing with this patient while in CT, he remained calm and I believe the patient would not have had the scan if it wasn't for him. His communication skills and approach to the patient has not gone unnoticed.</p>		

Clare Sherwood, Advanced Care Practitioner	York	Nominated by Gillian Wroe, patient
<p>Having had a previous 12 hour traumatic experience in the Emergency Department, I was anxious when my GP advised I needed to go in again, with breathlessness, laboured speech and chest discomfort.</p> <p>I was seen by Claire who listened regarding my symptoms of previous mini stroke. After all the blood tests and a chest X-ray she put in place a referral to the stroke unit and medication for if it had been a TIA, plus I've since had stroke Ward appointment and a carotid Doppler scan to make sure things are as they should be. She also listened concerning my long term lumbar problem flaring up with walking on crutches and the strong painkillers prescribed in orthopaedics which were causing some complications. Clare prescribed alternative medication which has helped tremendously.</p> <p>Apart from being a good listener, she is also a very caring medic, who despite being very busy in ED, is polite, reassuring and explains each stage in the diagnosis. She makes you feel like a person and not just an NHS number patient who is a problem.</p>		
Gemma Coultas, Domestic Assistant	Scarborough	Nominated by a colleague
<p>Gemma always has a smile on her face, she brings such joy to the ward. No job is ever too much for her. If she hears a nurse/HCA say they need something or ask for something for a patient, within moments Gemma has returned with whatever it was they needed.</p>		

Helen Chiplin, Datix Manager	York	Nominated by Faye Howes, colleague
<p>During a particularly busy week where several members of the team were on leave and some were off with Covid, Helen took on some of the responsibilities of four different members of the team like an absolute superhero. She wasn't just asked to do this - she offered. The team would not have been able to function without this kind offer of support. I had only been in my new post for just over two weeks and was without my new manager whilst also helping to cover the work of a teammate on leave. Needless to say it was a big challenge when so new to my role, and at times felt insurmountable. Helen went above and beyond and took on so much extra work to support me and the team and make sure everything got done. Despite her huge workload, Helen still made the effort to check in on me and offer emotional support as well as noticing when I was struggling and offering to take on even more work just to help me out. Helen personifies great teamwork and the Trust values and she genuinely cares about those she works with and tries to make a difference to their work lives and emotional wellbeing. I honestly would have been lost without her. Thank you Helen.</p>		
Sarah Cranmer Staff Nurse	York	Nominated by Amy Holgate, colleague
<p>Sarah is always so hard working on Ward 34. She is thorough, lovely with patients, leads by example and goes above and beyond to deliver a safe and excellent standard of care. Last week she was involved in the care of a poorly patient on Ward 34 who had expressed a wish to stroke a horse before she died. Sarah came in on her day off after arranging a friend to bring a horse to the hospital to visit. This was such a wonderful thing to do and made such a positive difference to what might have been this patient's final days. I know she will not ever forget the kindness you showed to her and your colleagues are very lucky to have you. Well done Sarah.</p>		

Hannah Fretwell-Bates Midwife	Selby	Nominated by Emily Lewis-Ashley, patient
<p>I first met Hannah when I was eight weeks pregnant and from the moment I met her she made me feel at ease. Her professionalism and friendly manner helped ease any worries I had throughout my pregnancy. Hannah’s personality and sense of humour lights up a room when you walk in. She is an inspiration and a fantastic midwife. You should be very proud Hannah.</p>		
Heather Mather Community Physiotherapist	St Nelson’s Court	Nominated by Natalie Ross, colleague
<p>I wish to nominate Heather as she makes such a difference to the well-being of our team. Heather will always take the time to check in with her colleagues and to make sure that they are okay. She is always on hand to offer support and advice, taking on extra duties regularly on top of her already busy days. She goes above and beyond for her patients. She is a dedicated and hard-working and makes our days that much brighter because she is part of our team.</p>		
Sue Smith Generic Therapy Assistant	Bridlington	Nominated by Kerry Headlam
<p>Sue has been working on the new unit at Bridlington as a therapy assistant. Sue constantly goes above and beyond her role within patient care, safety and well-being. Sue is a great part of the team and is a pleasure to work with. Sue has a great understanding of patient’s needs and wants, and always makes time to get to know them better so that the care she provides is the best it can be. Sue works very hard on the Unit enabling all the patients to keep moving and ensuring that everything is in place for patients to be discharged home or to a placement. Sue is a credit to the trust and always ensures she follows the trust values at all times. Just want to say a massive thank you.</p>		

Rachel Corley, Team Leader	York	Nominated by Victoria Clint, patient
<p>I rang the x-ray department to change the appointment I had been allocated. I was very pleased for my call to be answered by Rachel. Her telephone manner and how she dealt with me in such a friendly but professional way was above and beyond my expectations. Rachel found me another appointment as I was going on holiday and did not want to miss this important x-ray. As a first port of call Rachel gave excellent patient service. Well done Rachel. Please will you pass these comments on to Rachel and her line manager. Thank you.</p>		
Procurement Team	York	Nominated by Sheena Mason, colleague
<p>The Purchasing Team are always helpful and quick to offer their expertise when asked for. They work extremely hard and no matter how trivial or challenging the requests, you can rely on their support. I think they are all worthy of a star award.</p>		
Stuart Ward, Advanced Clinical Practitioner	Scarborough	Nominated by Adam, colleague
<p>On three very busy nights, Stuart went above and beyond. As well as working through patients as safely and efficiently as possible, he stayed two hours (minimum!) late on two of the nights. On one of the nights, with a nurse down due to a transfer, he stayed on as the nurse AND clinician in ED RAZ, beyond his shift finish time. He worked extraordinarily hard throughout the period (as he does always!) and managed a very challenging set of shifts with professionalism, dedication, and his usual enthusiasm. He demonstrated excellent team work, commitment to his colleagues and patients, and dedication to his profession. I am proud to call him a colleague.</p>		

Sophie Hoult, Doctor	Scarborough	Nominated by Niamh Dixon, colleague
<p>A young lady presented during a busy Saturday shift with collapse and other worrying symptoms. Dr Hoult prioritised the patient and thoroughly assessed her, where the patient had previously felt she had not been listened to, Dr Hoult took the time to listen to all of her concerns and gain a thorough history. Because of this history, Dr Hoult organised an urgent CT scan for the patient, which would not normally be undertaken on a weekend, but Dr Hoult insisted on the scan with radiographers due to the worrying nature of the patient's symptoms. It became apparent through the scan that the patient had a large saddle embolus PE and treatment and monitoring was able to begin immediately due to Dr Hoult's quick thinking and thorough assessment.</p> <p>Not only did Sophie act as the patient's advocate to ensure quick diagnosis and treatment, but her bedside manner is exemplary and she always treats every patient with respect, kindness and patience. She is an absolute asset to EAU and this is just one brilliant example of how she exemplifies the trust values through her patient care.</p>		
Sian Jones, Senior Orthoptist	York	Nominated by Alex Campbell, relative
<p>My daughter was referred to see and Sian in 2020 aged 5 during the pandemic, and I think the service has been amazing. We have had no disruptions in her care and appointments through this period. The care and attention Sian has shown has been wonderful, and has really helped my daughter's vision. She is 7 now and has been discharged, and we are a little sad we won't get to come see Sian again and wear the green and red glasses. Sian is an asset to the ophthalmology department and the NHS.</p>		

Sandra Agyemang, Staff Nurse	York	Nominated by Virginia Russell, colleague
<p>Sandra is an international nurse and arrived in the UK from Ghana around 8 months ago. She is very proud of working on ward 39 and was supported by the Trust to take the NMC test of competence allowing her to work as a registered nurse in the UK. Sandra now spends time on her days off from the ward to support the new international nurses training for their NMC exams. She travels over to York University to work alongside Trust Clinical Educators and help in the classroom. Having taken the NMC exam herself Sandra feels her experience and understanding helps the new nurses to settle and not feel nervous as they prepare. Just Brilliant!</p>		
POCT Team, SHYPS	York	Nominated by Joanna Andrew, colleague
<p>The POCT team at Hull led by Alex Clubley had their first inspection under the UKAS standards in April and were successfully awarded accreditation. This is a huge achievement and means Hull is only the 5th laboratory in the country to gain accreditation. This is due to the hard work, expertise and dedication of Alex and her team. This also gives reassurance that the Trust is providing a safe POCT service for its patients.</p>
