The Pre 5's A.M.D.A. Team assesses children with complex social and communication difficulties, up to the age of five years old.

## **Why is my child being offered this assessment?**

Your child is being offered an assessment due to concerns about their social interaction skills, speech and language, and difficulties with flexible thinking / behaviour.

## **Who is part of the assessment team?**

The core team includes the following professionals:

- Consultant Community Paediatrician
- Advanced Clinical Specialist Speech and Language Therapist

# What does the team do?

The Pre 5's A.M.D.A. provides a detailed assessment of each young person looking at:

- Their social communication skills
- How they interact and understand others
- Their social imagination / play
- Any repetitive behaviours / routines
- What they are interested in (and to what extent)
- What they do well, how they behave / respond
- What they find difficult and where they need help

Before the assessment begins the Consultant Community Paediatrician will have asked you and your child's school to complete and return a detailed questionnaire which will be used in your child's assessment.

# **What happens in the assessment?**

The assessment takes place over a number of weeks as follows:

## **Intake Meeting:**

The team reviews the referral information and decides if it is appropriate for your child to be referred for an Autism Assessment at this point in time.

## **Observations & Assessments:**

Team members will visit your child's school to watch him/her. There will also be clinic appointments to attend, where team members carry out their individual assessments with your child.

## **Outcome Meeting:**

Following your child's assessment, the team only will meet to discuss their assessment findings and reach a decision as to the outcome of the assessment.

A feedback meeting will be arranged to inform you about the outcome.

# **What happens once the assessment is complete?**

After the feedback meeting you will be sent a letter outlining:

- the outcome of the assessment
- the next steps in your child's care

This information will also be shared with your child's educational setting and any other professionals involved with them. This would be in addition to a letter with a summary of the speech and language therapy findings.

If the team think other services could help your child, they will talk to you about this and make a referral to services they feel could help.

## **Your opinion matters**

When the feedback letter is sent to you, a questionnaire to give feedback on your experience of the service will also be sent. This helps us to know what we are doing well and what we could do better.

## **Who do I contact if I have questions?**

If you have any questions at any stage of your child's assessment, please contact us. Our contact details are on the front cover of this leaflet.

## **Tell us what you think of this leaflet**

We hope that you found this leaflet helpful. If you would like to tell us what you think, please contact:

Alison Thompson, Pre 5's Autism Multi-Disciplinary Team Administrator, Child Development Centre, The York Hospital, Wigginton Road, York, YO31 8HE, telephone: 01904 726595.

## **Teaching, training and research**

Our Trust is committed to teaching, training and research to support the development of health and healthcare in our community. Healthcare students may observe consultations for this purpose. You can opt out if you do not want students to observe. We may also ask you if you would like to be involved in our research.

## **Patient Advice and Liaison Service (PALS)**

PALS offers impartial advice and assistance to patients, their relatives, friends and carers. We can listen to feedback (positive or negative), answer questions and help resolve any concerns about Trust services.

PALS can be contacted on 01904 726262, or email [pals@york.nhs.uk](mailto:pals@york.nhs.uk).

An answer phone is available out of hours.
