Patient Care Plan For:

Date of Test: _____

Audiologist: _____

Audiogram (hearing test results):

How to read your audiogram:

On the audiogram your Audiologist has drawn your hearing test results for air conduction, using headphones or insert earphones. Each circle (right ear) and cross (left ear) represent the quietest sound you heard at a particular pitch.

To give you a sense of how some everyday objects make certain types of sounds, we have put some pictures on the audiogram. They demonstrate the objects loudness and the range of pitches that they make. For example, a dripping tap has low-pitched qualities, which are also quiet, that is why it is shown in the upper left corner of the chart. Sports motorbikes or jet aeroplanes, however, are usually very loud and high pitched, which is why they are shown in the bottom right corner of the chart.

The letters in the chart demonstrate approximately, where each speech sound appears during normal adult male speech (regardless of the spoken language). The upper right of the graph shows mainly consonant sounds, which are generally high pitched but quiet. Vowel sounds tend to be low-pitched, but a bit louder than consonants, so they appear in the middle-left part of the audiogram.

Above the circled and crossed lines drawn by the Audiologist is the region of sound that you are unable to detect. Below the line, you can hear sounds at those pitches. The next page details the type and severity of your hearing loss.

Summary of Test Results:

A large, empty rectangular box with a thin black border, intended for writing a summary of test results.

Individual Plan:

A large, empty rectangular box with a thin black border, intended for writing an individual plan.

Tell us what you think of this leaflet

We hope that you found this leaflet helpful. If you would like to tell us what you think, please contact:

The Audiology Department, The York Hospital,
Wigginton Road, York, YO31 8HE or telephone
01904 726741.

Teaching, training and research

Our Trust is committed to teaching, training and research to support the development of health and healthcare in our community. Healthcare students may observe consultations for this purpose. You can opt out if you do not want students to observe. We may also ask you if you would like to be involved in our research.

Patient Advice and Liaison Service (PALS)

PALS offers impartial advice and assistance to patients, their relatives, friends and carers. We can listen to feedback (positive or negative), answer questions and help resolve any concerns about Trust services.

PALS can be contacted on 01904 726262, or email yhs-tr.patientexperienceteam@nhs.net.

An answer phone is available out of hours.

Leaflets in alternative languages or formats

If you would like this information in a different format, including braille or easy read, or translated into a different language, please speak to a member of staff in the ward or department providing your care.

Patient Information Leaflets can be accessed via the Trust's Patient Information Leaflet website:
www.yorkhospitals.nhs.uk/your-visit/patient-information-leaflets/
