

Antenatal Renal Tract (kidney and bladder) Abnormalities

Information for patients, relatives and carers

① For more information, please contact: Child Health, The York Hospital Wigginton Road, York, YO31 8HE or telephone 01904 721187

Congratulations on the birth of your baby

During your routine antenatal care, your ultrasound scans identified an abnormality within your baby's kidney and / or bladder system. These are common and the abnormality may have disappeared by the time your baby is born.

However, some of these abnormalities may continue to be present and can lead to possible problems.

After the delivery of your baby, we will aim to do some or all of the following investigations. This will depend on the actual abnormality found during your antenatal care.

- An ultrasound scan of your baby's kidneys/bladder within five to seven days of birth.
- A further ultrasound scan of your baby's renal tract when they are three months old.
- Other x-ray tests, for example a micturating cysto-urethrogram (MCUG); this is a bladder x-ray.

We may also start a small dose of an antibiotic daily to prevent any urine infections depending on the results of the investigations.

This antibiotic should be continued until all the tests have been completed and your baby has been reviewed by the doctors. Not all babies require all of these tests. Often the postnatal scans are normal.

If you cannot attend the scan please contact the X-ray Appointments Clerk on telephone number 01904 726676 to cancel and rearrange the scan.

It is important that you understand why these tests are being done.

Please ask the doctors to answer any questions you have before you go home with your baby. There will be further useful information regarding these tests at www.infokid.org

If you have any concerns regarding your baby following discharge, please discuss these with you midwife, health visitor or GP.

Tell us what you think of this leaflet

We hope that you found this leaflet helpful. If you would like to tell us what you think, please contact:

Dr Luke McLaughlin, Consultant Paediatrician, The York Hospital, Wigginton Road, York, YO31 8HE or telephone 01904 725727.

Teaching, training and research

Our Trust is committed to teaching, training and research to support the development of health and healthcare in our community. Healthcare students may observe consultations for this purpose. You can opt out if you do not want students to observe. We may also ask you if you would like to be involved in our research.

Patient Advice and Liaison Service (PALS)

PALS offers impartial advice and assistance to patients, their relatives, friends and carers. We can listen to feedback (positive or negative), answer questions and help resolve any concerns about Trust services.

PALS can be contacted on 01904 726262, or email pals@york.nhs.uk.

An answer phone is available out of hours.
